

SEMINARIO

“Cognition and behavior in learning disabilities”

Dr. JOSE' L. NAVARRO

Department of Psychology, University of Cadiz (Spain)
Visiting professor

For the last 25 years an interdisciplinary team (Psychologist, Engineers and educators) from University of Cadiz (Spain) have been working in several areas related with cognition and human behavior: ways for understanding autism "*theory of Mind*" and implication in TEA diagnostic, identification of cognitive bases of early mathematic learning, or how evidence-based Psychology can help in designing software for different target populations (early math low achievers students, TDAH, elderly people). The seminar will introduce several areas of interest in research of learning disabilities developed by the interdisciplinary team.

Giovedì 15 Marzo 2018
ore 11.00
