

**Letter of Appreciation for the university course entitled “Clinical Psycho-Sexology”**

To whom it may concern,

As a Professor of Psychology and Director of the Doctoral Programme on Human Sexuality at Porto University, and president of the World Association for Sexual Health (WAS), I am writing this letter of appreciation of the new Master’s degree in Clinical Psychology proposed for the year 2019/2020 by “Sapienza University of Rome” together with the “University of Rome Tor Vergata” entitled "Clinical Psycho-Sexology ", under the responsibility of Professor Chiara Simonelli and Professor Emmanuele A. Jannini.

My support derives from the importance of the training project and the high scientific and educational quality of the course (held entirely in English Language and addressed to both foreign and Italian students). Furthermore, this Master Course will play an important role in qualifying professionals to work in both public health services and private practice (fulfilling a very important health need) . The “Clinical Psycho-Sexologist” provides countless professional opportunities, not only from a purely clinical and research point of view, but also at the institutional and forensic level.

I fully believe that the university program "Clinical Psycho-Sexology " would be a great addition to your educational offer.

Best regards,

Porto, 23<sup>th</sup> October 2018

Pedro Nobre

Associate Professor of Psychology

Director of the Doctoral Programme in Human Sexuality

Porto University, Portugal

President of the World Association for Sexual Health (WAS)
