

# Dr. Marco Sbroscia - Ph.D.

---

## PERSONAL INFORMATION

**Office:** (+39) 06.4991.4304

**Lab:** (+39) 06.4991.4254

**E-mail:** marco.sbroscia@uniroma1.it

## CITIZENSHIP

Italian

## WORK

**Graduated technician, official and technical manager of SmartLab: Sapienza Università di Roma - Dipartimento di Fisica** Rome, Italy.

Starting from 16th December 2019

- Brief description: SmartLab is a facility of the physics department of Sapienza, University of Rome. It has been designed to perform spectromicroscopy experiments in the demanding Ultra High Vacuum condition, thus guaranteeing an atmosphere free of contaminants. Systems can be also probed at cryogenic regime (10 K). The aim of this laboratory is the characterisation of low-dimensional systems by means X-rays photoemission spectroscopy and micro-Raman and micro-photoluminescence spectroscopies. My role is to manage and coordinate all the technical and operational aspect of the lab, supporting and participating in the research activities taking place there.
- Technicals: Ultra High Vacuum, Photoemission spectroscopy from core levels and valence band, electron diffraction, UHV micro-Raman spectroscopy, 2D materials, maintenance and development of UHV compatible parts.

## RESEARCH INTERESTS

My research interest is mainly devoted to the characterisation of materials whether they are solutions or crystalline solids and interfaces. After consolidating standard characterisation techniques, as electron spectroscopies, synchrotron radiation based spectroscopies and Raman microscopy, I moved the attention to non standard approaches, as coincidence electron spectroscopies and single-photon based interferometry, both under the applicative and technical aspects.

## PREVIOUS POSITIONS

Post Doctoral position at  
**Università degli Studi Roma Tre - Dipartimento di Scienze - Laboratorio di Spettroscopia Raman, Diagnostica per i beni culturali**, Rome, Italy.

1st January 2019 - 15th December 2019

- Project: **DTC Lazio - ADAMO**  
- Analysis, diagnostics and monitoring techniques for preservation and restoration of Cultural Heritage
- Topic: **Analysis, diagnosis and monitoring of Cultural Heritage**
- Group leader: Prof. Maria Antonietta Ricci
- Brief description: Characterisation of artworks as wall paintings, painted leathers or marbles to name a few, using Raman Spectroscopy aiming at determine the used color palette, the presence of modern consolidation treatments if any and the study of degradation processes.
- Technicals: **Conventional and high-confocal Raman Spectroscopy, lasers, monochromators, spectrometers.**

Post Doctoral position at  
**Università degli Studi Roma Tre - Dipartimento di Scienze - Ottica -**  
**Gruppo NEw Quantum Optics (NEQO)**, Rome, Italy.

**1 April 2016 - 31 December 2018**

- Project: **FETOPEN-RIA QCUMbER**
  - frequency-entanglement control in parametric down-conversion with ultra-fast pulses;
  - multiparameter estimation in dispersive samples.
- Topic: **Development of an electronic acquisition chain for coincidence measurements with quantum light for application in quantum metrology.**
- Group leader: Prof. Marco Barbieri
- Brief description: Characterisation of materials using non conventional techniques, as quantum light-based interferometry, with the perspective of applications in biology, plasmonics and quantum enhanced sensing. In this respect I explored the extension of quantum metrological protocols to the case of noisy environment. I also studied the interplay between quantum information and thermodynamics, characterising the cost of realising and processing a measurement, thus exploring the relation bridging quantum metrology and quantum thermodynamics, looking also at non-equilibrium states.
- **Technical:** Laser sources, Spatial light modulator, Manipulation of light beams, interferometry, optical elements

Fellowship at  
**Università degli Studi Roma Tre - Dipartimento di Scienze - Laboratorio LASEC** Rome, Italy.

**January 2015 - October 2015**

- Topic: **Development and characterisation of a multichannel electron analyser.**
- Advisors: Professor Giovanni Stefani, Professor Alessandro Ruocco
- Brief description: The core of this activity has been the development of a LabVIEW code for remote control and data acquisition from a multichannel analyser for spectroscopy and time correlation measurements, including the remote control of sample manipulation and the high voltage supplies for the electrostatic optics. As preliminary activity, the whole pre-existent acquisition and control software has been updated.
- **Technical:** electrostatic analysers, multichannel position sensitive detectors, electronic/acquisition chains, HV supplies, electrostatic lenses assembly.

TEACHING

**01 November 2018 – 31 October 2019**

*Tutor for the course of Mechanics and Thermodynamics for the industrial engineering program - Frontal classes.* Università Campus Bio-Medico, Via Alvaro del Portillo 21, 00128 Roma (Italia)

**01 March 2019 – 31  
October 2019**

*Tutor for the course of Fundamentals of Physics B for course on studies in architecture - Frontal classes.* Università degli Studi Roma Tre, Roma (Italia)

**01 November 2017 – 31  
October 2018**

*Tutor for the course of Mechanics and Thermodynamics for the industrial engineering program - Frontal classes.* Università Campus Bio-Medico, Via Alvaro del Portillo 21, 00128 Roma (Italia)

**01 November 2016 – 31  
October 2017**

*Tutor for the course of Mechanics and Thermodynamics for the industrial engineering program - Frontal classes.* Università Campus Bio-Medico, Via Alvaro del Portillo 21, 00128 Roma (Italia)

**September 2016 – December 2017**

*Tutor for the online module in Quantum Optics of the course in Modern Physics within the LS-OSA project.*

Università degli Studi Roma Tre, Via della Vasca Navale 84, 00146 Roma (Italia)

**01 November 2015 – 31  
October 2016**

*Tutor for the course of Physics for the food sciences and human nutrition program - Frontal classes.* Università Campus Bio-Medico, Via Alvaro del Portillo 21, 00128 Roma (Italia)

## EDUCATION

**Università degli Studi Roma Tre**, Rome, Italy.

**January 2012 - December 2014**

### **Ph.D in Physics**

Degree completed on 27<sup>th</sup> January 2015

- Ph.D Thesis Topic: Auger-Photoelectron Coincidence Spectroscopy on magnetic thin films: a study of multiplet spin structure and electron correlation.
- Advisor: Professor Giovanni Stefani
- Area of Study: Growth, characterisation and analysis of magnetic thin films using photoemission, X-ray Magnetic Linear Dichroism (XMLD) and electron diffraction experiment; investigation of magnetic phase transition, local magnetism, final state multiplet spin contributions and correlation effects in ferromagnetic and antiferromagnetic systems by APECS coincidence spectroscopy using synchrotron radiation.

**September 2009 - September 2011**

### **Master degree in Physics**

Degree completed on 21<sup>st</sup> September 2011 - Mark: **110/110 cum laude**

- Thesis Topic: Local antiferromagnetism of NiO studied by Auger - Photo-Electron Coincidence Spectroscopy (written in Italian)
- Original title: L'antiferromagnetismo locale del NiO studiato per mezzo della spettroscopia di coincidenza fra fotoelettroni ed elettroni Auger

- Advisor: Professor Giovanni Stefani
- Area of Study: Growth, characterisation and analysis of NiO investigated by using synchrotron radiation based techniques like X-ray Magnetic Linear Dichroism (XMLD) and APECS coincidence spectroscopy.

September 2005 - February 2009

### Bachelor degree in Physics

Degree completed on 25<sup>th</sup> February 2009 - Mark: **110/110 cum laude**

- Thesis Topic: Raman spectroscopy on NaOH in aqueous solutions as a function of temperature and concentration (written in italian)
- Original title: Spettroscopia Raman su soluzioni acquose di NaOH in funzione di concentrazione e temperatura
- Advisor: Professor Maria Antonietta Ricci
- Area of Study: Investigation of the OH<sup>-</sup> ions dynamics and their hydration shell by the study of temperature and concentration dependence of the stretching spectral region in aqueous solution of NaOH using Raman spectroscopy.

### TECHNICAL SKILLS

#### • Software

- LabVIEW: high level - development of several data analysis codes and acquisition code for a multichannel electron energy analyser; NI-DAQ interface for remote control and automation.
- OriginPro: high level - used for data analysis and graphics.
- Wolfram Mathematica: basic level - development of simple simulation codes and data analysis.
- Blender 3D: basic level - development of picture and short movies of experimental setups.

#### • Hardware

- Development and use of custom linear and non linear (quantum) optical simulators
- Use and maintenance of ultra high vacuum systems
- Laser, X-ray, UV and electronic sources
- Electrostatic analysers
- Spectrometers and monochromators for light
- Growth and characterisation of ultrathin films, crystals and solutions
- Electron spectroscopies: X-ray photoemission spectroscopy, Electron Energy Loss Spectroscopy, Electron Diffraction, APECS and (e,2e)
- Optical Spectroscopies: Raman Spectroscopy, Quantum light based interferometry

### Participation at schools

**InMRAM 2013**, Grenoble, France (1<sup>st</sup>-3<sup>rd</sup> July 2013)

Introductory course on Magnetic Random Access Memory.

- The School gives basics of magnetism, spintronics and MRAM technology as general overview of their characteristics and applications for students, researchers and engineers in microelectronics.

## **STELLA school 2012**, Pavia, Italy (18<sup>th</sup>-29<sup>th</sup> June 2012)

School for Training in Experiments with Lasers and Laser Applications.

- The School is a laboratory session in which general overview of experimental techniques based on the use of lasers are given. Particularly two techniques chosen by the student are applied in performing experiments.

## **SILS school**, Duino, Trieste, Italy (7<sup>th</sup>-21<sup>st</sup> September 2009)

X School on Synchrotron Radiation: Fundamentals, Methods and Applications.

- The School gives a general overview of the characteristics and potentiality of Synchrotron Radiation to graduate students and young researchers interested in its use.

### AWARDS

**Degree award** granted by **ADISU**<sup>1</sup>.

for master degree thesis

**Scholarship** granted by **ADISU**.

academic year **2010/2011**

**Scholarship** granted by **ADISU**.

academic year **2009/2010**

**Scholarship** granted by **ADISU**.

academic year **2007/2008**

**Scholarship** granted by **ADISU**.

academic year **2006/2007**

### CONFERENCE PARTICIPATION

#### **Primo Convegno Nazionale del DTC Lazio**

Roma, Italy

**30<sup>th</sup> September 2019 - oral and poster presentations**

#### **Technart 2019**

Bruges, Belgium

**7<sup>th</sup> - 10<sup>th</sup> May 2019 - oral and poster presentations**

#### **QIM V**

Quantum Measurements and Information V, Rome, Italy

**4<sup>th</sup> - 6<sup>th</sup> April 2019 - poster presentation**

#### **GISR2017**

Italian meeting on Raman Spectroscopies and Non Linear Optical Effects 2017,  
Trieste, Italy

**7<sup>th</sup> - 9<sup>th</sup> june 2017 - oral presentation**

#### **IQIS2017**

10<sup>th</sup> Itaian Quantum Information Science Conference, Firenze, Italy

**12<sup>th</sup>-15<sup>st</sup> September 2017 - oral presentation**

### DISSEMINATION

- “Notte Europea dei ricercatori” 2018: Demonstrations - **Università degli Studi Roma Tre**
- “Occhi sulla Luna” 2017: Lab tours - **Università degli Studi Roma Tre**
- “Occhi sulla Luna” 2016: Lab tours - **Università degli Studi Roma Tre**
- “Notte Europea dei ricercatori” 2016: Demonstrations - **Università degli Studi Roma Tre**

OTHER  
ENGAGEMENTS

Referee for New Journal of Physics  
Referee for Minerals (MDPI)

Assistant supervisor for the Bachelor thesis of Irene Di Giorgio - "Spectroscopic study of blue minerals inside Latium volcanics"; Original title: "Studio spettroscopico di minerali blu nelle vulcaniti del Lazio"
