

OBJECTIVES

Giving sustainability to the new network of actors created by the project through the establishment of strong permanent relations aimed at improving the awareness of fraud.

Enhancing the exchange of information and data between operators and practitioners.

Improving the quality of information and data

Defining anti-fraud awareness projects and an annual activity program involving practitioners and academics providing them a specialised training, in order to reach the general aim of the project,

ANTI-FRAUD
OBSERVATORY

MISSION

Monitoring initiatives on training in the protection of the EU's financial interests in Europe and producing knowledge in the area of preventing and combating irregularities and fraud.

Creation of an appealing and transparent referral network and forum for sharing information, experiences and best practice at a European level and in the area of information technology tools.

Development of systems for collecting, analysing, presenting and exchanging key information, among all national and European institutional actors on the trends of new fraud risks related to the EU budget.

Enabling the enforcement of policies and supporting innovation in the area of protection of the EU's financial interests by implementing study and analysis of data based on certain and objective information

ACTIVITIES

Researches in the anti-fraud sector

Organisation of training activities

Realisation of an annual study

Creation of awareness campaigns

ANTI FRAUD OBSERV ATORY

WHAT IS IT?

An Anti-Fraud Observatory with a European transnational dimension perspective, which will give sustainability to the new network through relations aimed at improving the awareness of fraud and other illegal activities by enhancing transnational and multi-disciplinary cooperation.
