Presentation

Conceptions of the city have changed significantly in recent years. The character of major infrastructural, residential, commercial and manufacturing developments suggests that current challenges could be a great deal more than a blip in the course of history. The dialectic between the desire to restore the organicity of urban form and the incoherent reality of the actual city is at the core of some of the finest projects and plans.

Is this a line of thought that is practicable in future urban morphological research and architectural practice? Or should we accept the incoherence of cities as fascinating amalgams of fragments?

A central theme of the Conference is the 'reading' of existing cities in the light of a possible new organicity. Viewpoints from different disciplines will be compared: architecture, history, geography and urban planning. Discussions will deal with a variety of scales, from the territorial to the urban one, and from the whole city (or constellations of cities) to the scale of the individual building.

The twenty-second International Seminar on Urban Form (ISUF 2015) is hosted in Rome by the Faculty of Architecture - 'Sapienza' University, and takes place in Valle Giulia, via Antonio Gramsci 53, 00197, Rome, Italy, from 22 to 26 September 2015.

Public Discussion

Parallel session organization

Each parallel session will last two hours.

The remaining time, at the end of all presentations, should be used for general discussion involving authors and public.

A conference presentation should describe the purpose, methods, and conclusions of the research presented. A maximum of 15 minutes is allowed for the presentation of the paper and 5 minutes for questions to the authors.

Presenters and session chairs are expected to appear in the presentation venue 15 minutes before a session begins, so that they can load Power Points and meet other presenters. Sessions are normally limited to four/six presentations.

There will be a New Researchers Forum, in which researchers new to the field are invited to take part.

Wireless

We will provide you the internet keys during the conference registration.

To access to the network from a computer running Windows:

1. Click on the network connections icon that is available on the inferior right side of the screen.
2. Select the 'Sapienza' option and press 'Connect'.
3. Next, open an internet browser (IE, Mozilla, Chrome, etc.), the login page will be opened.
4. Put your username and password provided and enjoy our wi-fi.
