

Corso ATLS per Specializzandi V anno
Sapienza Università di Roma
Dipartimento di Scienze Medico Chirurgiche
e Medicina Traslazionale
12-13 giugno 2023
Building Universitario, Via di Grottarossa 1035
Coordinatori: Prof. Giuseppe Nigri, Prof. F. D'Angelo

The American College of Surgeons has developed the ATLS program for doctors and other qualified health care professionals. This program provides systemic and concise training for the early care of trauma patients. The ATLS program provides participants with a safe, reliable method for immediate management of the injured patient and the basic knowledge necessary to:

- Assess the patient's condition rapidly and accurately
- Resuscitate and stabilize the patient according to priority
- Determine if the patient's needs exceed a facility's capacity
- Arrange appropriately for the patient's inter-hospital transfer (who, what, when, and how)
- Assure that optimum care is provided and that the level of care does not deteriorate at any point during the evaluation, resuscitation, or transfer process

For doctors and other qualified health care professionals who infrequently treat trauma, the ATLS course provides an easy-to-remember method for evaluating and treating the victim of a traumatic event. For doctors and other qualified healthcare providers who treat traumatic disease on a frequent basis, the ATLS course provides a scaffold for evaluation, treatment, education, and quality assurance. In short, ATLS is a measurable, reproducible, and comprehensive system of trauma care.
