Research Activities

Keywords	Brief Description
Molecular mechanisms regulating leukocyte migration	Molecular Biology and Transcriptomic studies applied to the study of GPCRs belonging to the chemokine receptors family: 1) CCRL2 expression in cancer and inflammation (AIRC FIRC grant ID: 25307), publications (PMID): 39811276, 39228313, 37343073. 2) CXCR3 expression in liver colorectal cancer metastasis, publication (PMID): 40168086. 3) ACKR2 expression in lung metastasis, publication (PMID): 39843164.
Innate Immunity	Molecular Biology and Transcriptomic studies applied to: 1) the characterization of immune and endothelial cells expressing CCRL2, publications (PMID): 39811276, 37343073. 2) the characterization of the

	role of STATs transcriptional factor in ILCs maturation and activities, publications (PMID): 37756335, 36466890, 36466890. 3) role of innate immune cells in SARS-CoV2 infection and COVID-19 severity, publications (PMID): 39811276, 34375313.
Adaptive Immunity	Molecular Biology and Transcriptomic studies applied to the characterization of atypical populations of B cells in the context of vaccination efficacy and host protection from infection.
Tumor Immune Microenvironment	Characterization of the role of the innate immunity in solid tumor immunesurveillance by analyzing the expression of conventional and atypical chemokine receptors (CXCR3, CCRL2 and ACKR2) and their contribution to immune cells tumor homing by Molecular Biology and Transcriptomic studies, related publications (PMID): 40168086, 40168086, 37343073, AIRC FIRC grant ID: 25307.
Senescence and cancer	Studies applied to investigate the role of the mechanisms mediating tumoral senescence cell clearance by neutrophils, related publication (PMID): 38693312.
Molecular Biology	DNA and RNA extraction, PCR and qPCR, design of expression vectors, site-directed mutagenesis, CRISPR/Cas9 genome editing, related publications (PMID): 37343073, 30633749, 29882371, 29538751.
Structural Biology	Protein purification and crystallization, protein structure prediction and molecular structure visualization software, related publications (PMID): 40333971, 35437825, 32699193.
Transcriptomics	Bulk RNA-seq, scRNA-seq and spatial transcriptomics, related publications (PMID): 40168086, 39843164, 37756335, 37343073, 37248289, 36069062, 34347289.
Genetics	GWAS studies and SNP characterization, related publications (PMID): 39811276, 30633749, 29882371.
Bioinformatics	Good knowledge of R, basic knowledge of Python, applied to transcriptomic and genetic studies. Related publications (PMID): 40168086, 39843164, 37756335, 37343073, 37248289, 36069062, 34347289, 39811276.
