endocrine neoplasia syndromes	polymorphisms, therapy (new drugs, new combination schemes, new assays, therapy sequences), evaluation of the response to therapies.		
Diabetes and Cancer	He dedicated his early carrier to pituitary tumors and in particular to Cushing's disease by publishing many papers on JCEM and other well recognized journals of endocrinology. Since the time of his experience at the Gustave Roussy Institute in France, he focused on endocrine tumors and in particular on neuroendocrine neoplasms and hereditary neoplastic syndromes (i.e. MEN1, MEN2, paragangliomatosis) by elaborating many research projects and publishing several papers on journals of endocrinology and oncology. He also investigated thyroid tumors (both medullary and differentiated types), adrenal tumors, hyperparathyroidism, as well as systemic disorders such as diabetes mellitus and Fabry disease, always publishing his research in well recognized ISI journals. Recently, he developed some research projects and published original and review articles in the field of andrology and in particular on infertility, erectile dysfunction and sexual health.
