Part I – General Information

Full Name	Antonella Goggiamani
Spoken Languages	Italian, English

Part II – Education

Type	Year	Institution; Notes (Degree, Experience,..)
University graduation	2001	Laurea degree <i>summa cum laude</i> in Chemistry University of Rome “La Sapienza” Advisor: Prof. S. Cacchi Thesis: “ <i>Sintesi Palladio-catalizzata di N-ariossazolidinoni sostituiti</i> ”
Post-graduate studies	2002-2004	Post-graduate Research Fellow Dipartimento di Studi di Chimica e Tecnologia delle Sostanze Biologicamente Attive Facoltà di Farmacia, University of Rome “La Sapienza” Research Title: “ <i>Formazione di legami carbonio-carbonio e eteroatomo-carbonio catalizzata dal palladio e dal rame</i> ” Advisor: Prof. S. Cacchi
	2004-2006	Post-graduate Research Fellow Dipartimento di Studi di Chimica e Tecnologia delle Sostanze Biologicamente Attive Facoltà di Farmacia, University of Rome “La Sapienza” Research Title: “ <i>La catalisi del palladio nella formazione di legami carbonio-carbonio e eteroatomo-carbonio</i> ” Advisor: Prof. S. Cacchi
Ph.D.	2006	Ph.D. in Pharmaceutical Sciences University of Rome “La Sapienza” Dipartimento di Chimica e Tecnologie del farmaco

Thesis: "Formation of Carbon-Heteroatom and Carbon-Carbon Bonds via σ -Organopalladium Complexes"
 Advisor: Prof. S. Cacchi

Post-doctorate training	2006	Postdoctoral Research Fellow financed by GlaxoSmithKline University of Rome "La Sapienza" Dipartimento di Studi di Chimica e Tecnologia delle Sostanze Biologicamente Attive, Research Title: " <i>Utilizzo di diazo composti o triazine nelle reazioni palladio catalizzate</i> "
Schools	2002	XXVII Scuola A.Corbella, giugno 2002
	2003	4 th International school of organometallic chemistry-ISOC 2003, Camerino 6-9-2003

Part III – Appointments

III.A – Academic Appointments and National Scientific Habilitations

Start	End	Institution	Position
01/11/2006-		University of Rome "La Sapienza"	Researcher
03/09/2017		Dipartimento di Chimica e Tecnologie del Farmaco	SC 03/C1 (SSD CHIM/06)
		Faculty of Pharmacy and Medicine	
2013		MIUR	Abilitazione Scientifica Nazionale seconda fascia
			SC 03/C1 (SSD CHIM/06)
2018		MIUR	Abilitazione Scientifica Nazionale prima fascia
			SC 03/C1 (SSD CHIM/06)
04/09/2017-	present	University of Rome "La Sapienza"	Associate Professor
		Dipartimento di Chimica e Tecnologie del Farmaco	

III.B – Other Appointments

Start	End	Institution	Position
2022-present		University of Rome "La Sapienza"	Member of "Collegio dei Docenti" in Molecular Design and Characterization for The Promotion of Health and Well-Being: from Drug to Food
2020			Full member of the Committee for

2023

Admission to the Ph.D. Program in Pharmaceutical Sciences (XXXVI cycle)
Full member of the Committee for Admission to the Ph.D. Program in "Molecular Design and Characterization for The Promotion of Health and Well-Being: from Drug to Food" (XXXIX cycle)

Part IV – Teaching experience

IV.A - Teaching experience within the Academic Recruitment Field 03/C1, SSD CHIM/06 (courses and supplementary courses)

Year	Institution	Course
2002-2005	University of Rome "La Sapienza" Faculty of Pharmacy	General and Inorganic Chemistry, supplementary course
2004-2015	University of Rome "La Sapienza" Faculty of Pharmacy	Organic Chemistry, supplementary course
2012-2014	University of Rome "La Sapienza"	Organic Chemistry
2018-present	Faculty of Mathematical, Physical and Natural Sciences	Natural Science Degree 6 CFU
2013-present	University of Rome "La Sapienza" Faculty of Pharmacy and Medicine	Organic Chemistry I Pharmaceutical Chemistry and Technology Degree 9 CFU
2021-present	Università Cattolica del Sacro Cuore Faculty of Medicine and Surgery	Organic Chemistry, Pharmacy degree <i>Cultore della materia</i>
2010	Università degli studi della Tuscia	PhD Thesis committee
2019	Università degli studi di L'Aquila	PhD Thesis committee
2006-present	University of Rome "La Sapienza" Faculty of Pharmacy and Medicine	Laurea Degree Thesis committee (Pharmaceutical Chemistry and Technology Degree; Pharmacy Degree; Natural Science Degree)

IV.B – Other Teaching Activities

Start	End	Institution	Position
2022-present		University of Rome "La Sapienza"	Tutor of Ph.D. student Roberta

		Zoppoli in "Molecular Design and Characterization for The Promotion of Health and Well-Being: from Drug to Food"
20/07/2022	"University of Rome "La Sapienza"	Cycle of advanced lessons for PhD in "Molecular Design and Characterization for The Promotion of Health and Well-Being: from Drug to Food"
26/07/2023		<i>"Recent advances in metal-assisted cross-coupling processes: improvement of reaction results by MW irradiation"</i>

Part V - Responsibilities or Institutional Assignments

Start	End	Institution	Position
2019-2021		University of Rome "La Sapienza"	Departmental Representative for the Scientific Committee of the Center for Research and Services Saperi &Co.

Part VI - Funding Information

VI.A – Funding Information [grants as PI-principal investigator]

Year	Program, institution, duration, title	Grant value (€)

 Organometallic chemistry

Homogeneous catalysis

Heterogeneous catalysis

Heterocycles

C-H activation

Brief Description	<p>Antonella Goggiamani carries her research activity in the <i>Department of "Chimica e Tecnologie del Farmaco"</i> of the <i>University of Rome "La Sapienza"</i> in collaboration with Prof. Giancarlo Fabrizi.</p> <p>The scientific interests are focused on transition metal-catalyzed organic synthesis as testified by her publications in this area.</p> <p>Taking advantage of palladium, copper, and gold catalysis, she developed new practical and efficient synthetic methods both of general interest in the area of organic synthesis (formation of carbon-heteroatom and carbon-carbon bonds) and directed towards the <i>de novo</i> construction of a variety of polyfunctionalized molecules of biological interest, such as indoles, benzofurans, butenolides, quinolines, chromenes, quinolones, carbazoles, oxazolidinones, etc. Her studies allowed her to develop new protocols that were successfully applied to the creation of libraries of compounds. In addition to her expertise in the area of organometallic chemistry, A. Goggiamani can also rely on her strong expertise in structure determination by NMR and in the utilization of GC-MS.</p> <p>Her main research areas are:</p> <ul style="list-style-type: none">- The regio- and stereo-selective hydroarylation(hydrovinylation) of alkynes with aryl and vinyl halides, triflates and diazonium salts. With alkynes containing proximate nucleophilic and electrophilic centres, the syn carbopalladation step can be followed by a cyclization reaction. Often the cyclization step occurs <i>in situ</i> so that domino hydroarylation(hydrovinylation)/cyclization processes can be readily performed. This protocol has been widely used for the preparation of a variety of functionalized heterocycles. [Papers 3, 11, 20, 21, 38, 46]- The oxy- and aminopalladation/reductive elimination reactions of internal and external alkynes with organic halides, triflates, and arenediazonium salts. These reactions are based on the <i>trans</i> addition of an oxygen or nitrogen nucleophile and an organopalladium complex, formed <i>in situ</i>, to the carbon-carbon triple bond and have been used to develop new and selective approaches to the construction of a wide variety of functionalized heterocyclic rings. [Papers 2, 16, 17, 27, 29, 30, 31, 39, 40, 53]- Studies on the Heck reaction and the development of domino Heck reaction/cyclization. [Papers 6, 22-24, 29]- The development of new C-N, C-S and C-P bond forming reactions involving "soft" non-organometallic nucleophiles. [Papers 1, 4, 5, 8, 13, 15, 19, 28, 31]-The synthesis of carbonyl derivatives (carboxylic acids, aldehydes, acetophenones, amino ketones). [Papers 9, 10, 12, 18, 35, 50]- The utilization of new readily reusable heterogeneous catalyst systems, even using solid supported palladium nanoparticles. [Papers 3, 18, 33]- The utilization of room temperature ionic liquid in palladium and ruthenium catalyzed reactions. In fact, some of the ionic liquid properties (no detectable vapor pressure, possible recycling, easy separation from the products, thermal robustness) make them particularly promising candidates for the development of environmentally friendly synthetic methodologies. [Papers 3, 7, 11, 14]- A better understanding of the factors (ligands, added salts, bases, solvents, etc.) influencing the regio- and stereo-chemical outcome of the reactions.- The employment of boronic acids in palladium-catalyzed reactions. [Papers 31, 33, 39, 41, 48, 52, 67]- The employment of arenediazonium salts in palladium-catalyzed reactions [Papers 20, 21, 23, 24, 26-29, 33]
-------------------	--

- The development of new transition metal-catalyzed C-H bond activation processes, a research area of great current interest. Indeed, a process that is capable of forming carbon–carbon, carbon–nitrogen, or carbon–oxygen bonds via the direct functionalization of a carbon–hydrogen bond with transition-metal catalysis avoiding the preparation and use of organometallic reagents is an attractive alternative to “classical” cross-coupling reactions and more straightforward pathway. [Papers 34, 37, 54, 56]
- Gold and Silver catalyzed reactions. [Papers 36, 38, 49, 55, 57, 63, 64, 70]
- Synthesis of 2-(aminomethyl)indoles. [Papers 44, 45, 51, 66]
- Multisubstituted benzo[*b*]furans and indoles through a copper - and/or palladium-catalyzed assembly and functionalization process. [Papers 31, 40, 48, 60]
- Reactivity of propargylic derivatives in palladium catalyzed reactions. [Papers 35, 43, 47]
- Reactivity of indolylmethylacetates with N, O, S, C soft nucleophiles [Papers 66, 67, 69, 71]
- Development of sustainable processes for the extraction, purification, and concentration of bioactive matrix compounds of plant origin, with particular reference to the side streams of biorefineries. [Paper 65]

Part XI– Selected Publications (January 2013 – December 2022)

A list of the publications selected for evaluation [16] is provided below. For each publication, the title, authors, reference data, journal IF (*InCites J. Cit. Reports*, calculated on the basis of the publication year, when available), and citations (Scopus and Web of Science, last update 27/07/2023) are reported. Six of the selected articles were published starting from January 1st of the fifth year preceding the year of publication of the notice of competition (2018 - 2022)
