| Dementia                  | <p>My research activity has been focused on the following main topics:</p> <p>1) Frailty in neurology: I have conducted both cross-sectional and longitudinal studies to elucidate the association between frailty and the risk, clinical expression, and outcomes of neurological diseases (i.e., dementia and mild cognitive impairment, Parkinson’s disease, multiple sclerosis, and epilepsy). I have also focused on the use of frailty measures in the design and conduction of clinical trials targeting neurodegenerative disorders.</p> <p>2) Cognitive disorders in migrants: I have leaded national and international research efforts aiming at exploring the magnitude and characteristics of dementia in international migrants. I participated in both qualitative and quantitative studies investigating the main barriers and resources in the provision of care for migrants with dementia.</p> <p>3) Methodological and ethical issues in the operationalization of predementia constructs: I have participated in international and multidisciplinary collaborations addressing the main methodological issues in the definition and adoption of predementia research entities (e.g., mild cognitive impairment, subjective cognitive decline, cognitive frailty) and their public health and ethical implications.</p> <p>4) Neuropsychiatric symptoms of dementia: I have focused my research on specific, poorly characterized neuropsychiatric symptoms of dementia, such as sundowning and inappropriate sexual behaviors.</p> |

## Part XI– Scientific Publications

### XI-A – Selected Publications (n=12)

**Canevelli M**, Jackson-Tarlton C, Rockwood K. Frailty for neurologists: perspectives on how frailty influences care planning. Lancet Neurol. 2024 Sep 11:S1474-4422(24)00291-6. doi: 10.1016/S1474-4422(24)00291-6. PMID: 39276779.

Author Role: First Author

Impact Factor (2024): 46.5

Citations Scopus: 0

Toccaceli Blasi M, Alfano AR, Salzillo M, Buscarnera S, Raparelli V, Cesari M, Bruno G, **Canevelli M**; Alzheimer's Disease Neuroimaging Initiative. Sex-specific clinical and neurobiological correlates of fatigue in older adults. Geroscience. 2024 Aug 12. doi: 10.1007/s11357-024-01259-0. PMID: 39129050.

Author Role: Last Author

Impact Factor (2024): 5.3

Citations Scopus: 0

**Canevelli M**, Wallace LMK, Bruno G, Cesari M, Rockwood K, Ward DD. Frailty is associated with the clinical expression of neuropsychological deficits in older adults. Eur J Neurol. 2024 Jan;31(1):e16072. doi: 10.1111/ene.16072. Epub 2023 Sep 22. PMID: 37738515.

Author Role: First Author

Impact Factor (2024): 4.5

Citations Scopus: 3

**Canevelli M**, Cova I, Remoli G, Bacigalupo I, Salvi E, Maestri G, Nicotra A, Valletta M, Ancidoni A, Sciancalepore F, Cascini S, Bargagli AM, Pomati S, Pantoni L, Vanacore N; ImmiDem Study Network; ImmiDem Study Group. A nationwide survey of Italian Centers for Cognitive Disorders and Dementia on the provision of care for international migrants. Eur J Neurol. 2022 Jul;29(7):1892-1902. doi: 10.1111/ene.15297. Epub 2022 Mar 10. PMID: 35189011
