Part I – General Information

Full Name	Maria Elena MIRANDA BANOS		
Spoken Languages	Spanish, English, Italian		

Part II – Education

Type	Year	Institution	Notes (Degree, Experience,...)
University graduation	1995	University of Malaga, Spain	Bachelor degree in Biological Sciences, score 9.48/10
PhD	2001	University of Malaga, Spain	PhD in Biological Sciences, score 10/10, cum laude

Part III – Appointments

IIIA – Academic Appointments

Start	End	Institution	Position
12/1995	01/2001	University of Malaga, Spain	PhD student, Laboratory of Animal Physiology
05/2001	10/2002	University of Cambridge, UK	Research Associate, Dpt. of Anatomy
11/2002	12/2008	University of Cambridge, UK	Research Associate, Dpt. of Medicine
12/2008	present	Sapienza University of Rome, Italy	Assistant Professor (Ricercatore a tempo indeterminato SSD BIO/06) at Dpt. of Biology and Biotechnologies ‘Charles Darwin’

IIIB – Other Appointments

Start	End	Institution	Position
07/2010	08/2010	Cambridge Institute for Medical Research, University of Cambridge	Visiting scientist
07/2011	08/2011	Cambridge Institute for Medical Research, University of Cambridge	Visiting scientist
07/2013	08/2013	Cambridge Institute for Medical Research, University of Cambridge	Visiting scientist
07/2014	08/2014	Cambridge Institute for Medical Research, University of Cambridge	Visiting scientist
07/2015	08/2015	Cambridge Institute for Medical Research, University of Cambridge	Visiting scientist
07/2016	08/2016	University College London, UK	Visiting scientist
07/2017	08/2017	University College London, UK	Visiting scientist

Part IV – Teaching experience

Year	Institution	Lecture/Course
1997-2000	University of Malaga, Spain	Practical classes to undergraduate students on Animal Physiology
2001-2008	University of Cambridge, UK	Supervision of undergraduate and PhD students
2009-present	Sapienza University of Rome, Italy	Supportive teaching activities for the Cell Biology and Neurobiology areas: seminars and examination of students
2011-present	Sapienza University of Rome, Italy	Lecturer (Titolare del corso) for the Cell Biology course (code 1034846), first year of the degree on Agro-industrial Biotechnologies (9 CFU, SSD BIO/06)
2009-present	Sapienza University of Rome, Italy	Board member of the PhD Course ‘Cell and Developmental Biology’
2009-present	Sapienza University of Rome, Italy	Supervisor of 6 Bachelor degree thesis, 6 Master degree theses and 2 PhD thesis

Students' evaluation of the teacher's performance for the Cell Biology course (code 1034846) in the degree 'Agro-Industrial Biotechnologies' (Opis) for the academic year 2016-2017, with 258 students who participated in the lessons and practicals and took the test. In a scale from 1 to 4 (where 1 at the indicates 'surely not', 2 indicates 'not rather than yes', 3 indicates 'yes rather than not' and 4 indicates 'surely yes') the indicators are all above level 3, coincident or above the average for the degree in Agro-Industrial Biotechnologies and for the Faculty of Sciences, as shown in the summary page attached at the end of this CV. The results for Opis 2013-14, 2014-15 and 2015-16 were very similar to those presented for 2016-17.

Part V - Society memberships, awards and honours

Year Title

1996	Extraordinary award for degree in Biological Sciences, University of Malaga, Spain
1996-2000	PhD Fellowship from the Spanish Ministry of Education and Science
2008	American Society for Cell Biology membership
2011-present	Italian ABCD (Associazione Biologia Cellulare e del Differenziamento) membership
2016-present	Italian GEI (Gruppo Embriologico Italiano) membership

Part VI - Funding information [grants as PI-principal investigator or I-investigator]

Year	Title	Program and role	Grant value
2000 - 2005	Strategies to prevent cirrhosis and dementia by blocking serpin polymerisation in vivo	MRC (UK) Programme Grant to D.A. Lomas - I	
2006 - 2008	Pathobiology of the serpinopathies	MRC (UK) Programme Grant to D.A. Lomas - I	
Call 2009	Ruolo del Reticolo Endoplasmatico in alterazioni funzionali di proteine neuronali implicate in patologie di tipo neurologico	Grant from Sapienza University of Rome, Italy - PI	Euro 13,000
07/2010 - 07/2011	Development of monoclonal antibodies to block the polymerisation of Z alpha-1 antitrypsin	Pilot and feasibility grant from the Alpha-1 Foundation, USA - co-PI	USD 40,000
Call 2010	Mechanisms of cell toxicity of neuroserpin polymers that cause the dementia FENIB	Grant from Sapienza University of Rome, Italy - PI	Euro 10,000

2010	Behavioural, biochemical and molecular characterisation of novel animal models of hyperphenylalaninemia: how phenylalanine leads to mental retardation.	Grant from Sapienza University of Rome for 'Macroarea 5', to Dott.ssa T. Pascucci - I	Euro 32,000
2011 - 2014	Handling and toxicity of polymerogenic mutants of the serpins within the endoplasmic reticulum	Under 40 Grant from the Pasteur Institute - Cenci Bolognetti Foundation, Rome - PI	Euro 90,000
Call 2011	ER quality control of neuronal proteins and protein misfolding diseases of the central nervous system	Grant from Sapienza University of Rome, Italy, to Dott.ssa A. De Jaco - I	Euro 12,000
11/2011 - 06/2015	The role of neuroserpin in familial encephalopathy with neuroserpin inclusion bodies (FENIB)	Grant from the Telethon Foundation, Italy - co-PI (Rome Unit PI)	Euro 140,400 (Rome Unit)
Call 2013	Characterisation of neuroserpin polymer toxicity in a new neuronal model of the dementia FENIB	Grant from Sapienza University of Rome, Italy - PI	Euro 7,000
Call 2014	Comparative analysis of the transcriptome in cells expressing wild type or mutant neuroserpin causing dementia FENIB	Grant from Sapienza University of Rome, Italy - PI	Euro 5,000
Call 2015	Uncovering new toxicity pathways in the neurodegenerative dementia FENIB	Grant from Sapienza University of Rome, Italy - PI	Euro 8,400
Call 2016	Cellular pathways activated by pathological accumulation of neuroserpin polymers in the dementia FENIB	Grant from Sapienza University of Rome, Italy - PI	Euro 15,000
Call 2017	Characterisation of oxidative stress and mitochondrial dysfunction due to neuroserpin polymers in the dementia FENIB	Grant from Sapienza University of Rome, Italy - PI	Euro 11,000
09/2017 - 08/2018	Dissecting immunomodulatory mechanisms of A1AT with function-neutralising monoclonal antibodies	Pilot and feasibility grant from the Alpha-1 Foundation (USA) - PI	USD 40,000
01/2018 - 12/2019	Cellular pathways involved in the toxicity of neuroserpin polymers that cause dementia FENIB	Pasteur Institute-Cenci Bolognetti Foundation, Italy - PI	Euro 40,000

Part VII – Research activities

Research fields and stages in qualified international institutions

Keywords	Institution and period	Brief Description
Subcommissural organ, ependimal gland, monoclonal antibodies	<p>University of Malaga, Spain, 07/1992 to 05/2001 (undergraduate, graduate and PhD student)</p> <p>University of Clermont-1, Clermont-Ferrand (France), 05-07/1999 (research stage as PhD student)</p> <p>University Austral, Valdivia (Chile), 05-07/2000 (research stage as PhD student)</p>	<p>During my degree thesis and PhD thesis (1995 to 2001) I focussed my research on the characterisation of the glycoproteins secreted to the cerebrospinal fluid by the subcommissural organ, a conserved ependimal gland located in the roof of the third cerebral ventricle. As part of these studies, I purified the glycoproteins from cow brain tissue and produced a set of specific monoclonal antibodies used for further studies by immunocytochemistry and <i>in vivo</i> experiments.</p>
Axon guidance, development of the nervous system, growth cone, <i>Xenopus laevis</i>	Dpt. of Anatomy, University of Cambridge, UK, 05/2001 to 10/2002	<p>My first postdoctoral period in Cambridge (UK) (2001 to 2002) was dedicated to the study of the mechanisms of axon guidance during brain development, using the visual system of <i>Xenopus laevis</i> as model system. More specifically, we studied the responses of retinal ganglion cell growth cones to ephrin and Eph signalling molecules, and showed that these responses were modulated by intracellular levels of cyclic GMP and by endocytosis.</p>

		<p>Dpt. of Medicine, University of Cambridge, UK, 11/2002 to 12/2008</p> <p>Dpt. of Biology and Biotechnologies ‘Charles Darwin’, Sapienza University of Rome</p> <p>July and August 2010, 2011, 2013, 2014 and 2015: Summer research stages at the Cambridge Institute for Medical Research, University of Cambridge (UK)</p> <p>July and August 2016 and 2017: Summer research stages at University College London (UK)</p>	<p>Since November 2002, first at the University of Cambridge (UK) and from 2009 at Sapienza University of Rome, my research has focussed in the field of protein misfolded diseases, particularly the serpinopathies, a group of human diseases caused by polymerisation and intracellular deposition of mutant variants of different serpin (serin protease inhibitors) proteins. We study the cell biology of the serpinopathies, focussing on the handling of serpin variants within the endoplasmic reticulum (ER) of cells: synthesis, folding, glycosylation, degradation, trafficking and secretion, as well as ER and cellular responses to the presence of polymers. As part of our research, we have produced a series of conformation-specific monoclonal antibodies against alpha-1 antitrypsin and neuroserpin, including antibodies specific to pathological polymers and antibodies able to accelerate or prevent the polymerisation of a disease causing variant of alpha-1 antitrypsin.</p>

Reviewer for international journals

Peer-review of manuscripts submitted to the following journals: Blood, Journal of Leukocyte Biology, Frontiers in Cellular Neuroscience, Scientific Reports

Part VIII – Summary of Scientific Achievements

Product type	Number	Data Base	Start	End
Papers [international]	51	Scopus	1997	2018
Papers [national]	-			
Books [scientific]	1	Scopus	1997	2018
Books [teaching]	-			

Total Impact factor (year of publication)	297.608
Total Citations	2312
Average Citations per Product	45.3
Hirsch (H) index	21
Normalized H index*	0.913

*H index divided by the academic seniority (23 years from Bachelor degree).

Comparative criteria for the present evaluation (criteri comparativi ai fini della valutazione, bando art. 1)

All values have been calculated using the database Scopus

Total number of publications	51
Hirsch index	21
H index in the last 10 years (2008-2018)	17
Total citations	2312
Citations of articles published in the last 10 years (2008-2018)	1633
Average citations per publication	45.3
Total impact factor (publication year)	297.608
Average impact factor per publication	5.835
Teaching experience	as detailed in part IV

Other scientific achievements

- Commercialisation of the monoclonal antibody 2C1 against pathological polymers of alpha-1 antitrypsin (Miranda et al, 2010, Hepatology) through Hycult Biotech (The Netherlands)
- Italian 'Abilitazione Scientifica Nazionale per Professore di Seconda Fascia' Bando 2012 (DD n. 222/2012).
- Since 2014, my bibliometric parameters exceed the three numerical thresholds set in 2012 by ANVUR to obtain the ASN for 'Professore di I Fascia' for the BIO/06 - 05/B2 sector.

Full list of publications

Present to 1997, including the impact factor corresponding to the year of publication (ISI Web of Knowledge) and the number of citations for each publication (Scopus).
