

DAVIDE ANTONIO RAGOZZINO

Curriculum Vitae

Place ROMA
Date 4/4/2017

Part I – General Information

Full Name	DAVIDE ANTONIO RAGOZZINO
Date of Birth	=====
Place of Birth	=====
Citizenship	ITALIAN
Permanent Address	=====
Mobile Phone Number	=====
E-mail	=====
Spoken Languages	English, French

Part II – Education

Type	Year	Institution	Notes (Degree, Experience,...)
University graduation	1990	University Tor Vergata Roma	Biology, 110/110 cum Laude
Post-graduate studies			
PhD	1995	University of l'Aquila	Biotechnology
Specialty			
Pre-doctorate training			
Licensure 01			
Licensure 02			

Part III – Appointments

IIIA – Academic Appointments

Start	End	Institution	Position
2006	present	University La Sapienza Roma	Associate Professor/ Group leader
1995	2006	University La Sapienza Roma	Assistant Professor
1993	1994	Inserm U29-Paris	Research fellow
1990	1993	Lab of Biophysics, Istituto Regina Elena Rome	Predocctoral fellow
1994	1995		

IIIB – Other Appointments

Start	End	Institution	Position
2017		Doctorat en Neurosciences- Faculty of	-

		Medicine, Aix-Marseille University - Bogomoletz Institute of Physiology	President of the final evaluation Board -
2010	2016	University La Sapienza	Academic Senate Member (2 terms)
		Doctorate in Neurophysiology "Sapienza" University of Rome	Board Member
2011	2014	University La Sapienza Faculty of Pharmacy and Medicine	Council Member
2006	2012	University La Sapienza-CdL Applied Pharmaceutical Sciences (SFA)	Secretary CdL
2003		l'Institut de Neurobiologie de la Méditerranée, Marseille, 09/03.	Scientific Exchange CNR-Inserm 2003-2004
2002		l'Institut de Neurobiologie de la Méditerranée Marseille, 7-8/02.	Scientific Exchange CNR-Inserm 2002-2003

President of final commission of evaluation of the Doctorat: Neurosciences- Faculty of Medicine of Aix-Marseille University -Bogomoletz Institute of Physiology, Kiev, January the 31th 2017.

Part IV – Teaching experience

Year	Institution	Lecture/Course
2016-	University La Sapienza-Faculty of Pharmacy and Medicine	Human Physiology, DU Nurse S.Spirito
2012-	University La Sapienza-Faculty of Medicine	Human Physiology, CdL Medicine and Surgery «B» , Coordinator
2013-	University La Sapienza-Faculty of Pharmacy and Medicine	Human Physiology, CdL Biotechnology, Coordinator (until 2015)
2014-	University La Sapienza-Faculty of Pharmacy and Medicine	Physiology, CdL Orthoptics
2010-2012	University La Sapienza-Faculty of Pharmacy and Medicine	Physiology-CdL SFA, CdL Biotechnology, Coordinator
2006-2010	University La Sapienza-Faculty of Pharmacy	Physiology-CdL ISF, CdL Biotechnology
2001-2005	University La Sapienza- II Faculty of Medicine and Surgery	Human Physiology-CdL Medicine and Surgery
2000-2001	University La Sapienza- II Faculty of Medicine and Surgery	Human Physiology- DU Nurse, Lab technician, Physiotherapist
1999-2000	University La Sapienza- Istituto Regina Elena	Human Physiology, DU Nurse
1995-1999	University La Sapienza, Faculty of Medicine and Surgery, DU Nurse S. Camillo; Forlanini; Istituto Regina Elena, Roma	Human Physiology and Biophysics: exercises, tutorials and teaching support to students; participation as a member of the examination committee.

Students and pupils

Post docs

- Silvia Di Angelantonio, 2001-2005, present position Research Assistant Physiology University Sapienza
- Sonia Piccinin, 2008-2009; present position postdoc EBRI foundation, Rome
- Cristina Bertollini, 2009-2011; present position post doc Geneva University
- Francesca Pagani, 2011-2013; present position post doc IIT, Rome

Students:

- Bernadette Basilico PhD Neuroscience University Sapienza, 2014-2017
- Emanuele Murana Neurobiology 2010-2011; PhD Neurophysiology University Sapienza 2011-2014, present position post doc University of Verona
- Massimiliano Renzi, PhD Neurophysiology University Sapienza, 2000-2002; present position Research Assistant Physiology University Sapienza
- Eloisa Pellegrino, Neurobiology, University Sapienza 2014-2015, present position, postgraduate fellowship, Faculty of Medicine, University Paris Descartes.
- Nike Giordano, Biotechnology, University Sapienza 2014-2015
- Caterina Giordano, Neurobiology, University Sapienza 2012-2013
- Valentina Zambito ISF, University Sapienza 2009-2010
- Emanuele Zurolo, Neurobiology, University Sapienza 2007-2008, present position: PhD Academic Medical Center (AMC) Amsterdam 2009-2013: The role of astrocytes in the etiopathology of epilepsy.
- Valentina Tesori, Biological sciences, University Roma Tre

Trainees

- Auguste Valdisiute, Vilnius University, Erasmus+ mobility, 2016
- Sarah Garnier, Université de Poitiers - Faculté des Sciences Fondamentales et Appliquées, training agreement, 2014
- Antonietta Sucapane, Università Sapienza, postdoc training 2007

Part V - Society memberships, Awards and Honors

Year Title

2003-	Italian Physiological Society (SIF)
-------	-------------------------------------

Part VI - Funding Information [grants as PI-principal investigator or I-investigator]

Year	Title	Program	Grant value
2015	Neuronal-microglial signaling in synaptic development	Sapienza Grandi progetti 12 mesi	28.000 euro
2009	Studio degli effetti comportamentali, biochimici ed elettrofisiologici dell'espressione del frammento neurotossico 26-230 della proteina Tau	PRIN (Responsabile Unità operativa; 24 mesi)	64.500 euro
2001	Analisi biochimica, elettrofisiologica, anatomica e	FIRB Progetti Negoziali 2001 (Responsabile Unità)	182.800 euro

	comportamentale di topi geneticamente modificati nella via di trasduzione del segnale sinaptico Ras/MAPK	operativa; 36 mesi)	
Other projects			
2014	Neuroplasticità: dalle molecole al comportamento	Sapienza Congressi e convegni	2000 euro
2011	Microglial functional properties in development and aging	Sapienza <i>FARI</i>	7000 euro
2009	Regolazione delle proprietà della elettrofisiologiche e funzionali della microglia nell'ippocampo di topo da parte della chemochina CX3CL1 e del suo recettore CX3CR1	Sapienza Ateneo Federato SPPS	1100 euro
2008	Regulation of microglial properties by fractalkine	Sapienza Ateneo Federato SPPS	1000 euro
2007	Regulation of glutamatergic synaptic transmission by fractalkine	Sapienza Ateneo Federato SPPS	950 euro
2006	Gutierrez Rafael	Visiting Professor	3800 euro
2006	Regolazione della trasmissione sinaptica glutamatergica nel sistema nervoso centrale da parte di chemochine	Sapienza Facoltà di Farmacia	500 euro
2005	Ruolo delle chemochine nella regolazione della trasmissione sinaptica glutamatergica	Sapienza Facoltà di Farmacia	1500 euro
2003	Analisi elettrofisiologica e comportamentale di topi geneticamente modificati nella via di trasduzione Ras/MAPK	Sapienza Facoltà di Farmacia	3100 euro
2001	Ruolo funzionale dei recettori nicotinici nella trasmissione sinaptica centrale	Sapienza progetto Facoltà	7.000.000 lire

Part VII – Research Activities

Personal Statement

One of my long-standing interests lies in the modulatory role of chemokines in synaptic transmission. More particularly, I am coordinating a small research group with extensive experience in studying the role CX3CL1 signaling in synaptic plasticity and using this expertise to address questions related to microglia physiology and to the impact of microglia on neurodevelopment and synaptic function. This interest and my experience in synaptic physiology allowed the study of microglia-mediated pruning in hippocampal development. I am using advanced electrophysiological, fluorescence and confocal analysis in hippocampal slices from mice defective in neuron-microglia signaling, to understand the contribution of microglia-neuron interactions to the maturation of synaptic transmission.

Current Research Interests

- Chemokines and neuron-glia interactions in the central nervous system

- Microglia functional properties and synaptic circuit development and plasticity
- Microglial ionic channels
- Microglia functions in disease

Keywords	Brief Description
Synaptic transmission	Study of synaptic physiology in rodent and human slices
GABA/glutamate -	Gabaergic and glutamatergic neurotransmission: neurotransmitters, receptors and synapses
Chemokines	Neuromodulatory role of chemokines in the central nervous system
Fractalkine/CX3CL1	CX3CL1/CX3CR1 axis in neuron microglia signaling
Microglia -	Microglia functional properties in health and disease; role of microglia in synaptic development and plasticity

Main contribution to Science

Microglial role in synaptic pruning during development. The applicant contributed to the understanding of microglia developmental pruning in hippocampal development. Studies on CX3CR1 ko mice contributed to highlight of CX3CL1/CX3CR1 signaling on microglial physiology and its impact on postnatal synaptic refinement in mice. The absence of CX3CR1 causes profound changes in synaptic properties which do not recover in the adult and are associated to impairment in social behavior.

- Paolicelli RC et al. Synaptic pruning by microglia is necessary for normal brain development. *Science*. 333(6048):1456-8, 2011.

Role of neuronal chloride equilibrium in neuronal hyperexcitability.

The applicant contributed to the determination of the role of chloride disequilibrium, and in particular of chloride transporter dysfunction, in epileptogenesis. Studies on glioma-neuron interactions provided an explanation of the unknown mechanisms by which glioma cells affect neuronal chloride equilibrium, suggesting a sequence of events leading to the development of epileptic seizures in the brain of glioma patients. Glutamate released by glioma cells causes the increase of neuronal intracellular zinc, leading to KCC2 dysfunction in neurons, consequent change in the chloride equilibrium and impairing the inhibitory transmission in the peritumoral region.

- Palma E et al. Anomalous levels of Cl⁻ transporters in the hippocampal subiculum from temporal lobe epilepsy patients make GABA excitatory. *Proc. Natl. Acad Sci. USA* 103(22): 8465-8, 2006.

Characterization of neuromodulatory and neuroprotective action of fractalkine in the rat hippocampus

The applicant significantly contributed to the establishment and characterization of the role of CX3CL1 (fractalkine) as a neuromodulatory messenger in the brain. In particular electrophysiological studies in hippocampal slices and cultures lead to the understanding of the actions of soluble fractalkine on glutamatergic transmission, disclosing a complex pathway involving the release of adenosine from microglial cells and opening a new avenue of multiple postsynaptic modulation by adenosine receptor stimulation.

- Di Angelantonio S et al. Basal adenosine modulates the functional properties of AMPA receptors in mouse hippocampal neurons through the activation of A1R A2AR and A3R. *Front Cell Neurosci.* 9:409, 2015.

Electrophysiological properties of GABAA receptors in brain slices from patients suffering from temporal lobe epilepsy (TLE).

The applicant contributed to the understanding of GABAAR dysfunction in TLE patients. This research line allowed to correlate the basal mechanisms of GABAergic neurotransmission with clinical aspects. The functional properties of GABAA receptors in neurons and glial cells, and particularly the use-dependent rundown of GABA current and its regulation by phosphatases has been characterized (run-down) (20, 21, 24, 25, 28), by means of pioneering applying studies patch clamp technique on acute slices from human cerebral tissue from surgical resection, in TLE patients.

Neuromodulation and synaptic plasticity in the CNS: the role of chemokines

The applicant significantly contributed to the first studies on the neuromodulatory role of chemokines, which were carried out mainly by electrophysiological and fluorescence using acute slice of cerebral tissue or neuronal cultures leading to the following results:

Effects of cytokines and chemokines on plasticity mechanisms in the hippocampus; Characterization of the presence and functionality of chemokines receptors in the cerebellum. Effects of GRO α , GRO β , SDF-1, CXCL16: functional modulation of glutamate receptors, basal synaptic activity and plasticity and neuroprotection.
