

## **BUSTA B**

Il candidato illustri la procedura di sterilizzazione a vapore (autoclave)

Il Direttore del Dipartimento: funzioni

Il candidato illustri le principali funzionalità del software Word

Gallagher *et al.* in their study outlined contemporary evidence on PPE for health professionals and explored its relevance for dental professionals, with practical recommendations for action. They emphasized on the critical lack of relevant evidence and stated that further research is required involving dental personnel, procedures, and in dental settings. Therefore, the aim of this study was to compare the use of PPE and supplementary protective equipment (SPE) and the observance of PIC in dentists and their assistants before and after the corona crisis.
