02.2009 - 04.2009		Title: Typological and technology analysis to investigate recurrent environmental strategies in the design of high density. The research focused on the exploration of high density and low energy solutions with regard to High-Rise Buildings. Through the analysis of relevant case studies around the Globe, a set of parameters and indicators of sustainability dedicated to High-Rise Buildings were pointed out as a main result of this study. Findings were collected in a technical report. Sapienza Università di Roma - Ricerca di Facoltà PI: prof. E.Cangelli	Member of the research team
01.05.2008 - 31.07.2008		Title: Green High Rise – High Density Low Energy” This project developed a design proposal for the International Workshops Green High Rise – High Density Low Energy” in association with Laboratory for Integrated Design “Technische Universität München”. Ricerca di Facoltà	Member of the Research Team – Team Leader for the group of Rome
01.02.2008 - 31.04.2008		Title: Urban heat islands. Preliminary indications on general objectives, strategies and approaches. The research focused on the identification of research methods and tools in order to achieve an interaction between the different areas of study that were individually examined by the members of the research group. As coordinator, I organised the contributions of various authors in a synoptic view of the whole, extrapolating then some preliminary indications on this issue. Sapienza Università di Roma - Ricerca di Dipartimento PI: Prof. P.Peguiron	Coordinator of the research team
01.11.2007 - 31.01.2008		Title: Pre-feasibility study for the redevelopment and improvement of the former Spea area in the Municipality of Narni.	Member of the research team

The contribution given to the research group consisted of a compared analysis between human and natural infrastructure. Specifically, given my personal background, my contribution revolved around the examination of landscape systems, with a focus on the guidelines set forth by the European Landscape Convention (2004) and the implications on the measures to be adopted.
