Good evening professor,

I am Daniel Felipe López, student of the master program of Transport Systems Engineering at the Sapienza University of Rome and identified with matricola number 1794090. I applied for the Erasmus call A.A 2018-2018 for the Universidad Politécnica de Madrid with Erasmus Code E MADRID05 and with area code 0732, but today I noticed that my application was excluded because of an Incomplete Autocertification, which I don't understand as I compiled every module completely. As well, I was very worried and careful about doing a complete application, so I went previously to the Erasmus office in the Faculty of Civil and Industrial Engineering where they told me that the application was correctly presented and that it was only missing my School Diploma in the documents in order to prove my language proficiency, which I attached as well for the application.

I would greatly appreciate your help,

Sincerely,

Daniel Felipe López Velásquez
Civil Engineer, Industrial Engineer
