

**ALL. B**

Decreto Rettore Università di Roma “Sapienza” n. 1918/2023 del 19/7/23

**LUCIA NENCIONI***Curriculum vitae et studiorum*Rome, 28<sup>th</sup> July 2023**Part I – General Information**

Full Name	Lucia Nencioni
-----------	----------------

**Part II- Education**

Type	Year	Institution	Notes
University Graduation	26 <sup>th</sup> April 1993	University of Florence, Molecular Biology Lab, Institute of General Pathology	<b>Master’s Degree in Biological Sciences</b> Title of the thesis: "Approccio molecolare alla biocompatibilità: la trasduzione del segnale nel paziente emodializzato" (Supervisor Prof. Vincenzo Chiarugi)
Post-graduate studies	1994 (10 months)	University of Florence, Department of Clinical Physiopathology	<b>Fellowship</b> by “Associazione Fiorentina per lo studio dei meccanismi immunologici”. Title of the project “Purificazione di un fattore autocrino di crescita per le cellule di mieloma multiplo”
	8/5/1995 - 31/12/1995 (8 months)	University of Florence, Department of Clinical Physiopathology	<b>Professional collaboration</b> on the project “Purification of an autocrine growth factor in myeloma cells”
	25/3/1996 - 1/9/1996 (5 months)	University of Florence, Department of Clinical Physiopathology	<b>Professional collaboration</b> on the project “Purification of an autocrine growth factor in myeloma cells”

Pre-PhD training	1997 (10 months)	National Research Council (CNR), Structure and Function of Cellular Receptors Lab, Institute of Experimental Medicine, Rome	<b>Fellowship</b> by Istituto per lo Sviluppo e la Promozione delle Scienze Biomediche e Sociali. Title of the project: "Messa a punto dell'apparecchiatura BIACORE per lo screening di <i>libraries</i> combinatoriali di peptidi per l'individuazione di antagonisti recettoriali delle citochine"
	2000 (4 months)	National Research Council (CNR), Structure and Function of Cellular Receptors Lab, Institute of Experimental Medicine, Rome	<b>Professional collaboration</b> entitled "Caratterizzazione molecolare delle vie di degradazione di Bcl-2 in linfociti B di memoria"
PhD	PhD student 1997 - 2001	University of Rome "Tor Vergata", Microbiology Section, Faculty of Medicine	<b>PhD in Neuroscience</b> (27/05/2002)  Title of the thesis "Ruolo dell'interazione Bcl-2/GSH nel controllo della replicazione del virus influenzale A in cellule di neuroblastoma" (Supervisor Prof. Enrico Garaci)
Post-PhD training	11-13/02/2003	Becton Dickinson (Milan)	<b>Training course</b> on Flow Cytometry and use of FACSCan/FACSCalibur instrument
Professional qualification	1993 - 1994 (1 year)	University of Florence, Institute of General Pathology	Practical training for the <b>Qualification to the profession of Biologist</b> obtained on December 1994

### Part III - Appointments

#### IIIA – Academic Appointments

Start	End	Institution	Position	Research Programme
-------	-----	-------------	----------	--------------------

2002	2003	University of Rome "Tor Vergata", Microbiology Section, Faculty of Medicine, Department of Experimental Medicine and Biochemical Sciences	<b>Post-doctoral Position (1 year)</b> SSD MED/07	Signal transduction of cell death and viral infection (Tutor Prof. Enrico Garaci)
1/3/2003	28/2/2005	University of Rome Sapienza, Faculty of Pharmacy, Institute of di Microbiology	<b>Post-doctoral Position (2 years)</b> SSD MED/07	Role of intracellular molecular signalling in controlling viral replication (Tutor Prof. Anna Teresa Palamara)
1/3/2005	31/10/2006	University of Rome Sapienza, Faculty of Pharmacy, Institute of di Microbiology	<b>Post-doctoral Position (20 months)</b> SSD MED/07	Role of intracellular molecular signalling in controlling viral replication (Tutor Prof. Anna Teresa Palamara)
1/11/2006	31/10/2009	University of Rome Sapienza, Faculty of Pharmacy	<b>Assistant Professor of Microbiology and Clinical Microbiology</b> (not confirmed), SSD MED/07	
1/11/2009	29/10/2015	University of Rome Sapienza, Faculty of Pharmacy and Medicine, Department of Public Health and Infectious Diseases	<b>Assistant Professor of Microbiology and Clinical Microbiology</b> , SSD MED/07	
06/02/2014	06/02/2020		ASN - National Scientific <b>Qualification for the role of Associate Professor in Microbiology and Clinical Microbiology</b> (SSD MED 07)	Call 2012, DD n. 222/2012

30/10/2015	Today	University of Rome Sapienza, Faculty of Pharmacy and Medicine, Department of Public Health and Infectious Diseases	<b>Associate Professor in Microbiology and Clinical Microbiology</b> SC 06/A3 SSD MED/07	
20/06/2017	31/07/2017	Queens College of City University of New York, Department of Biology, NYC, USA	<b>Visiting Professor</b> at Molecular Biology Lab, Prof.ssa Zahra Zakeri	
20/03/2018	20/03/2029		ASN - National Scientific <b>Qualification for the role of Full Professor in Microbiology and Clinical Microbiology</b> SC 06/A3 SSD MED 07	D.M. n. 120 7/6/2016; Decreto-legge n. 198 29/12/2022

### IIIB – Other Appointments

<b>Academic appointments for teaching purposes</b>	
3-28/7/2023 (39° cycle)	<b>President of the Examination Board for the admission to PhD in Life Sciences</b> , Sapienza University of Rome (Decree n. 1661/2023 Prot. 0059973, 28/6/2023)
01/2012 - today	<b>Member of the Teaching board of PhD in Life Sciences</b> , Sapienza University of Rome
19/05/2023 - today	<b>Member of the Teaching Board of National PhD in Innovation in the diagnosis, prevention and treatment of infections at epidemic-pandemic risk</b> (coordination University of Siena)
2009 - today	<b>Member of the Teaching Committee</b> of Master Degree in Pharmaceutical Chemistry and Technology (CTF)
21/03/2014 - today	<b>Member of the Quality Committee</b> of Master Degree in CTF
2014 - today	<b>Participation as reference teacher</b> at the event “Porte Aperte alla Sapienza” for courses of Pharmacy and CTF (Master or Bachelor degrees)
2019 - 2021	<b>Included in the Disciplinary Experts Register</b> of the Italian National Agency for the Evaluation of Universities and Research Institutes (ANVUR)
19-29/09/2017 (33° cycle)	<b>Member of the Examination Board for the admission to PhD in Life Sciences</b>
01/2007 - 31/12/2011	<b>Member of the Teaching Board of PhD in Public Health Sciences and Microbiology</b>

07/09/2012	<b>President of “commissione vigilanza d’aula”</b> for the admission to Degree Course in Applied Pharmaceutical Sciences (D.R. 2947 of 31/08/2012)
------------	--

<b>Academic appointments for scientific purposes</b>	
2022 - 2025	<b>Coordinator of Microbiology Section</b> , Department of Public Health and Infectious Diseases
04/2011 - 10/2022	<b>Member of Research Committee</b> , Microbiology Section, Department of Public Health and Infectious Diseases
06/2012 - 10/2022	<b>Member of Funds Committee</b> , Microbiology Section, Department of Public Health and Infectious Diseases
01/2012 - today	<b>Registered in REPRISE</b> for the evaluation of MIUR programs
09/2012 - 07/2013	<b>Referee for ANVUR</b> (VQR 2004-2010 - GEV 06)
21/12/2007 - 12/2010	<b>President of Research Committee</b> of the Department Public Health Sciences “G. Sanarelli”, Sapienza University of Rome
2011 - today	<b>Member of the Examination Board</b> for Contract Researchers, Full Time or Fixed-Term Researchers and Associate Professors of Microbiology and Clinical Microbiology SSD MED/07

Organization of Scientific Events:

Rome, 23-24/06/2023	<b>Member of the Organizing Committee and of the Scientific Committee</b> of Italian Society of Pharmaceutical Microbiology (SIMIF ets) Congress. Congress programme link: <a href="https://nadirex.org/wp-content/uploads/2023/03/SIMIF.2324giugno.progr_.pdf">https://nadirex.org/wp-content/uploads/2023/03/SIMIF.2324giugno.progr_.pdf</a>
Rome, 17/5/2018	<b>Chair of Session 1</b> “Infectious diseases, microbiology and parasitology” at IX Seminar - PhD Day. Filling the science communication gap. Istituto Superiore di Sanità.
Rome, 20-21/01/2009	<b>Member of the Organizing Committee</b> of the Scientific day of Department of Public Health Sciences, Sapienza University.
Rome, 19/10/2006	<b>Participation to the Organization</b> of workshop on "Avian influenza and pandemic risk", Istituto Superiore di Sanità.

Third mission events:

2/12/2023	<u>Lifelong learning and open education:</u> <b>Member of Organizing Committee of a training course</b> entitled “Informazione agli operatori per il corretto utilizzo e approvvigionamento dei disinfettanti da impiegarsi in ambito sanitario e ospedaliero”. Rome, Sapienza University
-----------	---

17/02/2023	<u>Public engagement activity:</u> <b>Public dissemination of results</b> obtained in collaboration with the University of Urbino on molecule effective against SARS-CoV-2 replication. Prof Nencioni has contributed to the drafting of the <b>press release</b> published in various local newspapers; she also released an <b>interview</b> for the University of Urbino blog and published online at: - Ateneo blog: <a href="https://uniamo.uniurb.it/nuove-molecole-contro-sars-cov-2-lo-studio-di-uniurb">https://uniamo.uniurb.it/nuove-molecole-contro-sars-cov-2-lo-studio-di-uniurb</a> Uniurb social network: <a href="https://www.facebook.com/uniurbit">https://www.facebook.com/uniurbit</a> <a href="https://it.linkedin.com/school/uniurbit">https://it.linkedin.com/school/uniurbit</a> <a href="https://www.instagram.com/uniurbit">https://www.instagram.com/uniurbit</a>
15/10/2020	<u>Public engagement activity:</u> <b>Participation at “A porte aperte” television program</b> on Tele Universo (a local television broadcasting in the Lazio region) on COVID-19 field, link <a href="https://youtu.be/Nnbyu2TneUs">https://youtu.be/Nnbyu2TneUs</a> . The talk was aimed at updating on the search for vaccines against SARS-CoV-2 pandemic. The TV program has been disclosed on various social networks.

#### Part IV – Teaching experience

Since 2006 Prof. Lucia Nencioni has taught courses congruent with SSD MED/07 in various Master's and Bachelor's Degree courses at the Faculty of Pharmacy and Medicine, Faculty of Medicine and Psychology, Faculty of Medicine and Dentistry, Sapienza University of Rome.

In the period 2002 - 2021 she carried out supplementary teaching activities (lessons, practical exercises, member of the examination committee) within the Microbiology course for students of the 2nd year of the Degree Course in Chemistry and Pharmaceutical Technologies (CTF). She has also carried out supplementary teaching activities for the School of Specialization in Hospital Pharmacy and elective teaching activities (ADE) of 1 CFU for the Nursing Study Course.

She had a teaching assignment for the II-level Master in Molecular Virology, Sapienza University of Rome, on the topic "Influenza viruses vs parainfluenza viruses" (a.a. 2020 - 2021; 2021 - 2022).

In detail, the teaching activity includes:

Year	Institution	Course	CFU
a.a. 2018 - 2019 - today	Master's Degree Course in Medicine and Surgery, 2nd year Faculty of Medicine and Psychology, Sant'Andrea Hospital	Virology module within the Microbiology course	3 CFU
a.a. 2021 - 2022 - today	Master's degree course in CTF, 2nd year, Faculty of Pharmacy and Medicine	Microbiology	6 CFU

a.a. 2012 - 2013 - today	Master's degree course in CTF, 4th year, Faculty of Pharmacy and Medicine. The course is accompanied by practical laboratory exercises and seminar activities on topics of main interest in the field of Pharmaceutical Microbiology	Pharmaceutical Microbiology	8 CFU
a.a. 2014 - 2015 - today	Bachelor's Degree in Obstetrics, 1st year, Policlinico Umberto I°, Rome	General Microbiology	2 CFU
a.a. 2017 - 2018 - today	Bachelor's Degree in Dietetics, 1st year, Policlinico Umberto I°, Rome	Microbiology	2 CFU
a.a. 2020 - 2021 - today	Bachelor's Degree in Dietetics, 2nd year, Policlinico Umberto I°, Rome	Microbiology of Food	2 CFU
a.a. 2017 - 2018 and a.a. 2018 - 2019	Bachelor's Degree in Nursing, 1st year, Faculty of Pharmacy and Medicine, San Giovanni Addolorata, Rome	Microbiology	2 CFU
a.a. 2013-2014 until a.a. 2016 - 2017	Bachelor's Degree in Nursing, 1st year, Pomezia, Faculty of Pharmacy and Medicine	General Microbiology	2 CFU
a.a. 2013-2014 until a.a. 2016 - 2017	Bachelor's Degree in Nursing, 1st year, Pomezia, Faculty of Pharmacy and Medicine	ADE: Sexually transmitted diseases	1 CFU
a.a. 2006 - 2007 until a.a. 2011 - 2012	New Master's Degree in CTF, 5th year, Faculty of Pharmacy and Medicine	Applied Microbiology	4 CFU
a.a. 2011 - 2012	Bachelor's Degree in Applied Pharmaceutical Sciences, 2nd year, Faculty of Pharmacy and Medicine	Medical Microbiology	3 CFU
a.a. 2020 - 2021 and a.a. 2021 - 2022	Teaching assignment for the II-level Master in Molecular Virology	Influenza viruses vs parainfluenza viruses	

a.a. 2007 - 2008 and a.a. 2008 - 2009	School of Specialization in Hospital Pharmacy, 2nd year	Virology module within the Clinical Microbiology Course	
2002	ABBOTT Pharmaceutical Industry, Aprilia (LT)	Professional Training Course "Industrial Microbiology"	

Prof. Nencioni has been invited to hold seminars (scientific or educational) on her research activities, including the following:

14/07/2017	Queens College of City University of New York, Department of Biology, NYC, USA	<b>Scientific and educational seminar</b> entitled: “Differential redox state contributes to disparity in response to influenza virus infection in male and female mice”, for researchers and students of the MARC Program, a Master funded by the NIH which aims to introduce students to a research career.
07/07/2017	Queens College of City University of New York, Department of Biology, NYC, USA	<b>Scientific and educational seminar</b> entitled: “Autophagy is blocked by influenza virus through inhibition of HDAC6-mediated acetylation of cortactin”, for researchers and students of the MARC Program, a Master funded by the NIH which aims to introduce students to a research career.
28/06/2017	Queens College of City University of New York, Department of Biology, NYC, USA	<b>Scientific and educational seminar</b> entitled: “Influenza virus and redox mediated cell signaling: a complex network of virus/host interaction”, for researchers and students of the MARC Program, a Master funded by the NIH which aims to introduce students to a research career.
10/12/2014	PhD School in Life Sciences, Sapienza University of Rome	<b>Educational seminar</b> entitled: “Host cell redox-regulated pathways as targets for novel anti-influenza strategy”  Invited by Istituto Pasteur-Italia, Fondazione Cenci Bolognetti
25/11/2014	PhD School in Biochemical and Pharmacological Methodologies; PhD in Life Sciences, Health and Biotechnology.	<b>Scientific and educational seminar</b> entitled: “Host cell redox-regulated pathways as targets for novel anti-influenza strategy”  Invited by Dr. Fraternali, Department of Biomolecular Sciences, University of Urbino
24/05/2012	Section of Microbiology, Department of Public Health	<b>Scientific seminar</b> entitled: “Study of gender differences in the response to viral infection”. Departmental Seminars.

	and Infectious Diseases, Sapienza	
06/12/2001	PhD School in Neuroscience, University of Rome "Tor Vergata"	<b>Scientific seminar</b> entitled: "Role of intracellular factors in the control of influenza virus replication", as PhD student in Neuroscience

Prof. Nencioni has followed the elaboration of numerous theses:

- experimental or compilation theses of students of Master's Degree Courses in Pharmacy, CTF, Biological Sciences and Biotechnology;
- experimental theses of students of the PhD School in Life Sciences and in Infectious Diseases, Microbiology and Public Health.

## Part V – Society memberships, Awards and Honors

Year	Title
Riccione, Italy 13-16/10/2013	<b>Award for the best poster</b> entitled "The infection of intestinal cells with the influenza A virus promotes the adhesion of <i>E. coli</i> strains isolated from patients with Crohn's disease" by Aleandri M., Conte M.P., Simonetti G., Panella S., Celestino I., Checconi P., Longhi C., Garaci E., Palamara A.T., Schippa S., <b>Nencioni L.</b> Virology Session, 41st National Congress of the Italian Society of Microbiology  The candidate has directed all experimental activities concerning influenza virus infection presented in the poster.
Catania, Italy 6-9/10/2002	<b>Award for the best oral communication</b> entitled "Role of GSH and Bcl-2 in influenza virus infection". <b>Nencioni L.</b> et al. Virology Session, 30th National Congress of the Italian Society of Microbiology
Madrid, Espana 6-10/05/2000	<b>Award for the best poster</b> entitled "Nerve growth factor inhibits apoptosis via inactivation of p38 MAPK, prevention of Bcl-2 phosphorylation and cytochrome C release" by Torcia M., De Chiara G., <b>Nencioni L.</b> , Rosini P., Palamara A.T., Bonini P., Marlier L., Cozzolino F. 3rd Symposium of the International Cell Death Society  The candidate has obtained data relating to the regulation of Bcl-2 phosphorylative events following treatment with NGF
23/06/2023 - today	<b>Member of the Executive Board</b> of the New Italian Society of Pharmaceutical Microbiology ETS
2000 - today	<b>Member of the Italian Society of Microbiology</b>
2017 - today	<b>Member of the Italian Society of Virology</b>

Year	Title
2004 - 2023	Member of the Italian Society of Pharmaceutical Microbiology
2014 - 2017	Member of the Italian Society of Medical Virology

<p><b>Member of the Editorial Board of the following international scientific journals</b> Antibiotics, Frontiers in Microbiology – associated editor in Virology, Austin Virology and Retrovirology</p>
<p><b>Guest Editor</b> for International Journal of Molecular Sciences (IJMS), Special issue “Novel antivirals against Respiratory viruses”, deadline 20 Sep 2023.</p>
<p><b>Referee for the following international scientific journals</b> Antiviral Research, Antioxidants and Redox Signaling, Biomedicine &amp; Pharmacotherapy, British Journal of Pharmacology, Evidence-Based Complementary and Alternative Medicine, FASEB J, International Journal of Antimicrobial Agents, Journal of Medical Virology, Journal Cellular Physiology, Marine Drugs, Scientific Reports, Trends Microbiology</p>

## Part VI – Funding Information (grants as PI-Principal Investigator or I-Investigator)

Prof. Nencioni has obtained various grants from public and private institutions. As Head of the Virology research group, she has participated in numerous inter-departmental projects of the Sapienza University and she has contributed, as component of the research group, to many projects financed by public entities or private institutions.

In detail, the grants obtained are shown in the following table:

Year	Title	Program	Grant value, Role in the project
2022 (2 years)	Dual acting rEdox-modulating thiol molecules targeting Viral rEplication and infLammatory respOnse in resPiratory virus infections (DEVELOP)	<b>Progetti di Rilevante Interesse Nazionale (PRIN) PRIN 2022 PNRR</b> (Project n. P2022WRRNT)	Grant value: 239.389 Euro  Coordinator of the project (PI – Principal Investigator)

2022 (2 years)	Dissecting the host cellular response to develop novel host-targeted approaches against RNA viruses	<b>Progetti di Rilevante Interesse Nazionale (PRIN)</b> (Project n. 2022FRE3RH)	Grant value: 91.736 Euro  PI – Principal Investigator of Sapienza Research Unit
2022 (3 years)	One Health Basic and Translational Research Actions addressing Unmet Needs on Emerging Infectious Diseases (INFACT)	<b>National Recovery and Resilience Plan (NRRP)</b> , Investment 1.3 funded from the European Union – NextGeneration EU Partnerships extended (PE) 13 Emerging Infectious Diseases (Project n. PE00000007)	Grant value 20.000 Euro + Grants for 1 Type-A fixed-term researcher (RTDA)  Component of critical mass Sapienza – Spoke 1
2017 (3 years)	ORIGINALE CHEMIAE in Antiviral Strategy - Origin and Modernization of Multi-Component Chemistry as a Source of Innovative Broad Spectrum Antiviral Strategy	<b>Progetti di Rilevante Interesse Nazionale (PRIN)</b> (Project n. 2017BMK8JR)	Grant value 95.454 Euro  PI – Principal Investigator of Sapienza Research Unit
2010 (3 years)	Tecnologie OMICS e Systems Biology per la definizione di nuove strategie finalizzate al controllo delle infezioni virali	<b>Progetti di Rilevante Interesse Nazionale (PRIN)</b> (Project n. 2010PHT9NF_005)	Grant value 164.000 Euro  PI – Principal Investigator of Sapienza Research Unit
23/12/2022 (15 months)	Informazione agli operatori sanitari per la corretta individuazione dei requisiti in sede di approvvigionamento e utilizzo dei disinfettanti da impiegarsi in ambito sanitario e ospedaliero	<b>Collaboration agreement with Ministry of Health</b>  Third mission project	Grant value 71.011,25 Euro  PI – Principal Investigator
2019 (2 years)	Role of Glucose-6-phosphate dehydrogenase (G6PD) in regulating influenza virus replication and host response to infection	<b>Fondazione Cenci-Bolognetti – Istituto Pasteur</b> Anna Tramontano Call	Grant value 40.000 Euro  PI – Principal Investigator

2012 (2 years)	Discovery of influenza A virus non-structural protein 1 (NS1) inhibitors	<b>ISS-USA Program</b>	Grant value 40.000 Euro  PI – Principal Investigator of Sapienza Research Unit
2022 (1 year)	Assignment of the experimental service for verifying the effectiveness of Trenitalia sanitation Search for genome and proteins of SARS-CoV-2 in environmental swabs	<b>Third party agreement with Trenitalia company</b>	Grant value 12.447,6+IVA Euro  PI of Virology Lab
2022 (3 years)	Outcomes of uropathogenic <i>Escherichia coli</i> and virus co-infection in <i>in vitro</i> genitourinary cell lines	<b>Sapienza Ateneo</b> (Project n. RM1221816B319A 91)	Grant value 10.000 Euro  Head of Virology Unit
2021 (3 years)	Redox-modulating compounds in the treatment of influenza virus and coronavirus infections	<b>Sapienza Ateneo</b>	Grant value 3.000 Euro  PI – Principal Investigator
2020 (3 years)	The role of redox state in modulating ACE2 expression: a cell targeting based-approach for the treatment of SARS-CoV2 pathogenesis and inflammation	<b>Sapienza Ateneo</b>	Grant value 10.000 Euro  PI – Principal Investigator
2019 (3 years)	Amphibian skin-derived peptides as novel tools against drug-resistant respiratory microbial and viral strains in elderly and cystic fibrosis patients	<b>Sapienza Ateneo</b>	Grant value 10.000 Euro  PI of Virology Unit
2018 (3 years)	Hop and echinacea extracts as antiviral agents to support and prevent influenza virus infection	<b>Sapienza Ateneo</b>	Grant value 3.000 Euro  PI – Principal Investigator
2017 (3 years)	Antiviral activity of frog-skin antimicrobial peptides on DNA and RNA enveloped viruses	<b>Sapienza Ateneo</b>	Grant value 3.000 Euro  PI – Principal Investigator

2015 (3 years)	Evaluation of antiviral activity of frog-skin antimicrobial peptides and derivatives	<b>Sapienza Ateneo</b>	Grant value 9.000 Euro  PI – Principal Investigator
2016 (1 month)	Critical review of literature on ophthalmic products for the development of new therapeutic strategies	<b>Alfa Intes Industria Terapeutica Splendore</b> collaboration	PI – Principal Investigator

2020 (3 years)	DissectING the complex network of virus-cell Host interactions controlling virAL replication and inflammatory response to identify novel host targeted Approaches against severe respiratory virus infections (INHALA)	<b>Progetti di Rilevante Interesse Nazionale (PRIN)</b> (Project n. 2020KSY3KL)	I – Investigator Sapienza Unit
2015-2020 (3.5 years)	Nuovi Antimicrobici Ottenuti da Composti di Origine Naturale (NAOCON)	<b>Programma Operativo Nazionale (PON)</b> (Project n. ARS01_00597)	I – Investigator Sapienza Unit
2010 (3 years)	Sviluppo di molecole capaci di modulare vie metaboliche intracellulari redox-sensibili per la prevenzione e la cura di patologie infettive, tumorali, neurodegenerative e loro delivery mediante piattaforme nano tecnologiche	<b>Programma Operativo Nazionale (PON)</b>	I – Investigator Sapienza Unit
2009 (1 year)	Studio e sviluppo di nuovi farmaci antivirali contro infezioni da virus influenzale A-H1N1	<b>Ministry of Health</b>	I – Investigator Sapienza Unit
2007 (2 years)	Differenza di genere nella risposta alle infezioni: ruolo ed efficacia terapeutica degli antiossidanti naturali e sintetici	<b>Ministry of Health,</b> Strategic project	I – Investigator Sapienza Unit
2007 (2 years)	Innovative protocols to improve diagnosis and therapy of zoonotic and	<b>Ministry of Health,</b> Strategic project	I – Investigator Sapienza Unit

	arthropod-borne viral infections		
2006 (3 years)	Individuazione, caratterizzazione e valutazione preliminare dell'efficacia di strategie farmaceutiche innovative, basate sull'interferenza con vie metaboliche cellulari. Studio del loro uso per la prevenzione e la terapia di malattie ad eziologia virale	<b>Fondo per gli Investimenti della Ricerca di Base (FIRB)</b>	I – Investigator Sapienza Unit
2005 (3 years)	Ricerca e Sviluppo del Farmaco (CHEM - PROFARMA-NET). Sintesi, caratterizzazione biologica e farmacologica di nuove molecole organiche, biorganiche e naturali ad attività antidegenerativa (neuro o cardiovascolare), immunomodulatrice, antivirale ed anti-infettiva	<b>Piattaforme Reti FIRB</b>	I – Investigator Sapienza Unit
2019 (3 years)	Test rapido su urine, sangue e saliva con biosensori per la diagnostica di malattie infettive	<b>Regione Lazio</b> strategic project	I – Investigator Sapienza Unit
2014 (3 years)	Metodi innovativi per la determinazione di microorganismi, parassiti e sostanze tossiche	<b>Regione Lazio</b> Filas project	I – Investigator Sapienza Unit
2016 (3 years)	Role of G6PD deficiency in viral infections	<b>Sapienza Ateneo</b>	I – Investigator Sapienza Unit
2014 (2 years)	Molecular mechanism involved in NKG2D and DNAM-1 activating ligand regulation in human CMV-infected cells	<b>Sapienza Ateneo</b>	I – Investigator of Virology group, Department of Public Health and Infectious Diseases

2013 (2 years)	Study of the regulation of the expression of the ligands for the activating receptors NKG2D e DNAM-1 in human citomegalovirus infected cells: role of the DNA damage response pathway, of oxidative stress, and of IE1 and IE2 viral proteins	<b>Sapienza Ateneo</b>	I – Investigator of Virology group, Department of Public Health and Infectious Diseases
2010 (2 years)	Controllo dell'espressione genica e meccanismi di signaling intracellulare nella patogenesi di infezioni opportunistiche secondarie alle infezioni virali	<b>Sapienza Ateneo</b>	I – Investigator Sapienza Unit
2009 (2 years)	Meccanismi molecolari di riconoscimento da parte di recettori dell'immunità innata di cellule infettate o trasformate da virus: l'esempio del citomegalovirus e del papilloma virus umani	<b>Sapienza Ateneo</b>	I – Investigator of Virology group, Department of Public Health and Infectious Diseases
2007 (2 years)	Studio dei meccanismi antiapoptotici per la individuazione di nuove strategie antivirali	<b>Sapienza Ateneo</b>	I – Investigator of Virology group, Department of Public Health and Infectious Diseases
2012 (2 years)	Selective inhibition of Hemagglutinin maturation by cellular oxidoreductases: a potential target for novel anti-influenza strategies	<b>Fondazione Cenci Bolognetti – Istituto Pasteur</b>	I – Investigator of Virology group, Department of Public Health and Infectious Diseases
2010 (2 years)	Redox-regulated intracellular pathways involved in influenza virus replication as new potential targets for anti-viral drugs.	<b>Fondazione Cenci Bolognetti – Istituto Pasteur</b>	I – Investigator of Virology group
2009 (2 years)	Intracellular protein-protein interactions regulating viral replication as targets for novel antiviral strategies	<b>Fondazione Roma</b>	I – Investigator of Virology group
2009 - 2010 (10 months)	Evaluation of the in-vitro antiviral activity of 3 compounds – BR-5135, BR-5464, and BR-5119 against influenza A virus	<b>Bayer Schering Pharma AG,</b> Research agreement	I – Investigator of Virology group

2011 (2 years)	<i>Achromobacter xylosoxidans</i> an emerging pathogen in Cystic Fibrosis patients: from molecular characterization to development of innovative therapeutic strategies based on the anti-bacterial activities of <i>Bdellovibrio predator</i> bacteria	<b>Fondazione Fibrosi Cistica</b>	I – Investigator
-------------------	---	-----------------------------------	------------------

2017	Identification of biomarkers for the early diagnosis and prompt treatment of <i>Staphylococcus aureus</i> and influenza virus co-infections Consortium coordinated by Prof. Bettina Löffler and Prof. Christina Ehrhardt (Germany)	Cooperative Health research between the EU and Latin America-Caribbean countries (EU-LAC Health) (Project n. EULACH16/T02-0193)	The project was recommended for funding according to the evaluation ranking, but it was not funded for problems with Argentina co-funding, PI – Principal Investigator of Sapienza Research Unit
------	--	---	--

Prof. Nencioni has established numerous collaborations with national or international research groups, evidenced by publications with Italian or foreign co-authors, belonging to public or private institutions.

Among the foreign collaborators: Prof. John Hiscott, Director of the Pasteur Laboratories, Istituto Pasteur-Fondazione Cenci Bolognetti, Rome Italy; Prof. Stephan Ludwig, Institute of Virology, Westfälische Wilhelms-University Münster, Germany; Prof. Bettina Löffler and Prof. Christina Ehrhardt, Institute of Medical Microbiology, University Hospital Jena, Germany; Prof. Zahra Zakeri, Department of Biology, Queens College of City of New York, USA; Dr. Camillo Ricordi, Cell Transplant Center, Diabetes Research Institute, University of Miami Miller School of Medicine, Miami, FL 33136, USA.

## Part VII – Research Activities

Prof. Nencioni coordinates and carries out research activities at the Virology Labs dedicated to respiratory virus infections of the Microbiology Section, Department of Public Health and Infectious Diseases.

For years her research has focused on the study of the molecular mechanisms by which viruses interact with cellular signaling pathways, that are involved in the regulation of the viral replication cycle but also in the host response to infection. The research has allowed to identify and characterize cellular targets that can be blocked with natural or synthetic molecules for new antiviral strategies named “cell-targeted approaches”. Particular attention has been devoted to deepening the pathogenetic mechanisms of different respiratory virus infections, evaluating the virus-induced oxidative stress and the activation of antioxidant response and related genes upon viral infection by using *in vitro* and *in vivo* models. Furthermore, the relationship between antioxidant response and activation of interferon (IFN)-mediated pathways has been studied in respiratory-syncytial-virus- and rhinovirus-infected hospitalized children.

The interdisciplinary collaboration with other research groups has allowed to evaluate the antiviral activity of different molecules, like thiols, polyphenols, micronutrients and antimicrobial peptides against viral infections, including those by influenza virus or SARS-CoV-2.

Another research line concerns the study of cooperation between different microorganisms (viruses/bacteria) in the pathogenesis of acute and chronic diseases.

In detail, her scientific activity is mainly focused on the following topics:

<p><b>Cell-targeted approach for antiviral/antiinflammatory strategies:</b></p> <p>study of the mechanisms involved in the pathogenesis of respiratory viruses, for the identification of novel antiviral strategies aimed at interfering with cellular functions, rather than viral structures, necessary for viral replication</p>	<p>The research activity is aimed at investigating the molecular mechanisms underlying the activation of specific cellular pathways exploited by viruses for the correct development of the viral replicative cycle, with particular regard to redox-regulated pathways. In this context, the redox alterations in the infected cells have been well characterized and the role of some redox-sensitive enzymes in the replication of the influenza virus has been defined. Among these, the function of an isoform of the NADPH oxidase family (NOX4) and of an isomerase (PDI) present in the endoplasmic reticulum, in specific steps of the viral replicative cycle, has been identified. Moreover, the glutaredoxin 1 (Grx1) deglutathionylation activity has been shown to be important for influenza virus to complete the replication cycle. More recently, the study has been focused on the role of the enzyme glucose 6 phosphate dehydrogenase (G6PD) and of the nuclear factor NRF2 in the regulation of viral replication and the antioxidant response to infection.</p> <p>Findings related to this research topic have been reported in the following selected publications:  Amatore D. <i>Cell Microbiol</i> <b>2015</b>  Checconi P. <i>IJMS</i> <b>2020</b>  De Angelis M. <i>Frontiers Cell Infect Microbiol</i> <b>2022</b>  Checconi P. <i>FASEB J</i> <b>2023</b></p>
--	---

<p><b>Virus/host interaction:</b></p> <p>study of the relationship between host redox state and replication ability of RNA and DNA viruses</p>	<p>The research activity focused on the relationship between intracellular redox state and permissiveness to viral infection. In particular, the intracellular redox state in hepatitis C virus infection was investigated using a cellular model that mimics acute and chronic infection. The different response to influenza virus infection by the two sexes was also evaluated in a mouse model of male and female mice. Finally, NRF2-mediated antioxidant response was correlated to the interferon response in hospitalized pediatric patients affected by respiratory syncytial virus or rhinovirus infection.</p> <p>Findings related to this research topic have been reported in the following selected publications:  <b>Celestino I. <i>Frontiers Immunol.</i> 2018</b>  <b>Anticoli S. <i>Oxidat Med Cell Long</i> 2019</b>  <b>Sorrentino L. <i>Pathogens</i> 2023</b></p>
<p><b>Identification of novel antiviral compounds:</b></p> <p>evaluation of cytotoxicity, antiviral and/or anti-inflammatory activities of novel natural or synthetic compounds against DNA and RNA viruses.</p>	<p>The research was aimed at identifying and characterizing natural or newly synthesized compounds with antiviral/anti-inflammatory activities in experimental models of <i>in vitro</i> and <i>in vivo</i> viral infection.</p> <p>To this aim, different models of RNA or DNA virus infections have been developed for these studies. In particular, we set up an <i>in vivo</i> aging model of influenza virus infection to evaluate the immunomodulatory ability of glutathione derivatives in stimulating the lymphocytes Th1 response.</p> <p>Furthermore, in collaboration with other virologist groups, we evaluated the antiviral efficacy of synthesized compounds in experimental models of respiratory virus infections. Particular attention was devoted to evaluate redox-modulating compounds in inhibiting SARS-CoV-2 replication.</p> <p>Findings related to this research topic have been reported in the following selected publications:  <b>Di Sotto A. <i>Oxidat Med Cell Long</i> 2018</b>  <b>Marcocci M.E. <i>Antimicrob Agents Chemother</i> 2018</b>  <b>De Angelis M. <i>FASEB J</i> 2021</b>  <b>De Angelis M. <i>Biomedicines</i> 2021</b>  <b>Vicenti I. <i>Eur J Med Chem</i> 2021</b>  <b>Marcocci M.E. <i>IJMS</i> 2022</b>  <b>De Angelis M. <i>Pharmaceuticals</i> 2022</b>  <b>Fraternal A. <i>FASEB J</i> 2023</b></p>

<p><b>Mechanisms involved in infections caused by different microorganisms:</b></p> <p>study of cooperation mechanisms between pathogens (viruses/bacteria) in co-infections. Evaluation of molecules with antimicrobial activity in co-infection models</p>	<p>This research line has been focused on evaluating the role of different microorganisms in the pathogenesis of secondary infections that complicate viral infections or in the pathogenesis of chronic inflammatory diseases, such as Crohn's disease and cystic fibrosis. In particular, it has been demonstrated that influenza virus infection of intestinal cells increases the adhesion of bacterial strains isolated from patients with Crohn's disease. The setting up of co-infections is also useful to test compounds effective on different pathogens.</p> <p>Findings related to this research topic have been reported in the following selected publication: <i>Aleandri M. et al., PLoS One, 2015</i></p>
<p>In the years 1996-2001, the candidate also participated in research projects concerning the study of the mechanisms of signal transduction of neurotrophins, such as nerve growth factor, involved in the processes of death/survival of memory B lymphocytes. For this project, the CNR has given her an assignment for a collaboration aimed at characterizing the mechanisms of degradation of the anti-apoptotic protein Bcl-2 in memory B cells. The experience acquired in the development of models for the study of the mechanisms of activation/inactivation of apoptotic pathways, has allowed her to transfer this knowledge to the model of influenza virus infection.</p>	

- During the post-graduate practical training she collaborated on research projects concerning the study of the modulation of the receptor for the macrophage colony-stimulating factor following treatment with cytokines.
- During the preparation of the Master's degree thesis, she was involved in the study of second messengers, such as inositol phosphates and diacylglycerol, in patients undergoing hemodialysis.

### **Professional experience abroad**

Visiting Professor at the laboratory directed by Prof. Zahra Zakeri at Queens College, City of New York, USA, whose research group has a consolidated experience in the activation of autophagic and apoptotic processes in different models, including those of influenza, dengue and zika virus infections. During the period, Prof. Nencioni has held three seminars concerning her research lines to senior researchers, laboratory heads, and graduate and PhD students. She also participated in the laboratory's experimental activities as part of a common project. She also consolidated her experience in viral infection, production and titration methods (including emerging viruses) and gained experience in the isolation of primary murine cells.

### **Invited speaker at national or international congresses:**

- **Nencioni L.** Epigenetic modulators in the control of viral replication and host cell response. 50th national congress of the Italian Society of Microbiology, Naples 18-21 September 2022.

- **Nencioni L.** Redox-modulating agents in the treatment of viral infections. 23rd Virtual Meeting Paris Redox, 13-15 October 2021.
- **Nencioni L.** ACE2: a key factor in regulating SARS-CoV-2 and influenza virus infection. 5th National Congress of the Italian Society for Virology, Webinar 5-6 July 2021.
- **Nencioni L.** Nuove strategie per la lotta al virus di origine umana e animale, nell'ambito delle sostanze naturali, tra cui gli oli essenziali. Virtual Meeting SIROE 2020, 25 September 2020.
- **Nencioni L.** Infezioni da virus influenzali: stato dell'arte. 47th National Congress of the Italian Society of Microbiology, Rome 18-21 September 2019.
- **Nencioni L.** Lo stato redox regola la suscettibilità dell'ospite all'infezione da virus influenzale. 40° Congresso della Società Italiana di Microbiologia. Riccione (RN), Italia, 7-10 Ottobre 2012
- **Nencioni L.** Differenze di genere nella risposta alle infezioni virali: studio dei meccanismi coinvolti. 39th Congress of the Italian Society of Microbiology Riccione, 3-6 October 2011.

**Speaker at national or international conferences and congresses, most of them upon selection:**

- **Nencioni L.** Attività antivirale di S-Acetylglutathione sull'infezione da virus influenzale A PR8. 2nd National Congress of the Italian Society of Pharmaceutical Microbiology. Naples, 19-20 October 2005
- **Nencioni L.** Virus/host-cell interaction: a target for new anti-influenza strategies? Speaker at the Conference of the Faculty of Pharmacy, Sapienza University of Rome. Rome, 9-10 December 2004
- **Nencioni L.** p38MAPK: una chinasi cellulare coinvolta nella replicazione del virus influenzale e nell'apoptosi delle cellule infettate. 32nd National Congress of the Italian Society of Microbiology. Milan, 26-29 September 2004
- **Nencioni L.** Ruolo del GSH e di Bcl-2 nell'infezione da virus influenzale. 30th National Congress of the Microbiology Society. Catania 6-9 October 2002 (**award for the best oral communication for the session of Virology**).

Prof. Nencioni contributed to the design of the study, to the analysis and processing of the data and to the drafting of the manuscripts, as evidenced by her position in the author list as **first, last, or corresponding author** in most of publications in the last 10 years. Furthermore, she is the **leader of the virology group** in most of the publications presented in collaboration with researchers of the chemistry, pharmaceutical and biochemistry research fields.

- The candidate has contributed substantially to these publications, which are part of one of the main research lines of the group. In particular, the obtained results led to the identification and characterization of redox-regulated cellular pathways that are used by the influenza virus for its replication. The candidate participated in the design of the studies and directed the experimental activities in both *in vitro* and *in vivo* models. On the same topic, the candidate has produced, upon invitation, some reviews widely cited by other research groups.

- In these publications the candidate coordinated the research activities aimed at deepening the relationship between intracellular redox status, host response and permissiveness to viral infection. In particular, we correlated the NRF2-mediated antioxidant pathway to the interferon response in hospitalized pediatric patients affected by respiratory syncytial virus or rhinovirus infection. We also evaluated the intracellular redox state in a model of hepatitis C virus infection that mimics the acute and chronic infection.

- This publication is part of the research line aimed at evaluating gender differences in the response to viral infections. The candidate participated in the design of the study, directed all the experimental activities concerning influenza virus infections in a mouse model, discussed the data with the different collaborators and contributed substantially to the drafting of the manuscript.

- In these publications, which derive from the collaboration with researchers of pharmaceutical chemistry area, as well as with biochemistry or pharmacology areas, the candidate's contribution consisted in the direction of the research activities of virology lab, aimed at the evaluation of the antiviral/antiinflammatory activities of newly synthesized molecules, antimicrobial peptides or natural extracts. The candidate has also substantially contributed to the drafting of the manuscript, in all the parts concerning the biological activity of the studied compounds.

**n. 15** Aleandri M., Conte M.P., Simonetti G., Panella S., Celestino I., Checconi P., Marazzato M., Longhi C., Nicoletti M., Garaci E., Barnich N., Palamara A.T., Schippa S., **Nencioni L.** Influenza A virus infection of intestinal epithelial cells promotes the adhesiveness of *Escherichia coli* strains isolated from Crohn's disease patients. *PLoS One* **2015**: 10(2), e0117005. doi: 10.1371/journal.pone.0117005, PMID: 25706391 (IF/ year publication: 3.057, Q1; IF 2022: 3.7, Q2; cit. Scopus 9) (**Last name**)

- In this publication, the candidate had a prominent role in the study design and directed the research activities, as evidenced by her position as last author. In particular, during the study, the virus/bacteria co-infection model was developed and the experimental activities concerning the molecular mechanisms of cooperation between the different microorganisms were carried out. The results obtained allowed us to demonstrate that the infection of intestinal cells by influenza virus favors the adhesion of bacterial strains isolated from patients with Crohn's disease. The candidate also contributed substantially to the drafting of the manuscript.

In compliance with the art. 13 of the Italian Legislative Decree, n. 196 dated 30 June 2003 (Code regarding the protection of personal data) and art. 13 of the GDPR (EU Regulation 2016/679), I hereby authorize the processing of my personal data contained in this curriculum for the purpose of candidate selection activity.

Lucia Nencioni
