● WORK EXPERIENCE

Rome, Italy

PHD STUDENT IN PHYSICAL CHEMISTRY SAPIENZA UNIVERSITY OF ROME

Research: New and innovative electrolytes for the next generation of green energy storage devices. Study of innovative and biocompatible electrolytes with a computational-theoretical and experimental approach compatible with lithium-oxygen battery systems.

Supervisors: Enrico Bodo, Sergio Bruttì

● EDUCATION AND TRAINING

09/2019 – 07/2021

MASTER'S DEGREE (INORGANIC AND PHYSICAL CHEMISTRY) Sapienza University of Rome

Thesis: Calculations by Density Functional Theory of chemisorption mechanisms of sulfur dioxide in ionic liquids based on amino acids. It focused on a comparative study of the chemisorption mechanisms of sulfur dioxide with carbon dioxide in amino acid- based ionic liquids. Calculations were performed using Density Functional Theory with Gaussian16. The chemisorption mechanisms were studied both in the gas phase, to characterize the nature of the reactive process and in the liquid phase with an SMD solvation model, to reproduce the bulk conditions.

Professor: Enrico Bodo

Final grade 110 cum Laude

09/2016 – 07/2019

BACHELOR'S DEGREE Sapienza University of Rome

Professor: Domenico Stranges
