## MAIN ROLES AND RESPONSIBILITIES

|                                   |  |
|-----------------------------------|--|
| From March 2024                   | Member of EATRIS Node Reward Review Committee  |
| From March 2024                   | Contact person for the ISS's Technology Transfer Office  |
| From February 2024                | Main Italian representative in the Bord of Governors of EATRIS-ERIC  |
| From July 2022 to present         | <ul style="list-style-type: none"> <li>▪ Involved in the PNNR Project "Rome Technopole". Responsible for coordination activities of Spoke 2 of the ISS, with the aim of supporting the activities related to tasks 2.1 (Valorisation of research results for industrialisation), 2.2 (Valorisation of technologies for industrialisation), 2.5 (Training in technology transfer) and 2.6 (Patenting &amp; licensing), within the Health &amp; BioPharma.</li> <li>▪ Member of the "Technology Transfer Training' Working Group coordinated by Prof. Trovalusci of the University of Tor Vergata, within the Rome Technopole project.</li> <li>▪ Member of the working group 'Business acceleration and venture capital', coordinated by LVenture group, within the Rome Technopole project.</li> <li>▪ Scientific Director of the ISS's course "Protezione della proprietà intellettuale e del marchio: focus su dispositivi medici e biotecnologie", organized by ISS within the Rome Technopole project (19 may 2023).</li> <li>▪ Mentor in the "TECNE" Accelerator program. Rome Technopol project (<a href="https://www.techne-rometechnopole.it/">https://www.techne-rometechnopole.it/</a>)</li> <li>▪ Scientific Director of the ISS's course "La valutazione di sicurezza ed efficacia di un dispositivo medico: dalle indagini cliniche alla sorveglianza post-commercializzazione (16-17 may 2024).</li> </ul> |
| From august 2021<br>To present    | Involved in the agreement between the ISS and MiSE on the coordination of national interlocutors who intend to participate in the launch at European Union level of one or more European projects (IPCEI - Important Projects of Common European Interest) in the value chain of Smart Health and pharmaceuticals  |
| From December 2020<br>To present  | Member of the working group formed to examine the operational and legal options to create centres of competence EATRIS, on a national basis.   |
| From February<br>To December 2019 | Member of the working group formed to identify and quantify contributions from each Member State to the implementation of the European infrastructure EATRIS-ERIC activities   |
| From 2018<br>To present           | Chair of the platform of Intellectual Property and Technology Transfer of the Italian node A_IATRIS of the European RI EATRIS-ERIC   |
| From 2018<br>To present           | Scientific Director of Intellectual Property and Technology Transfer Workshops organized at A_IATRIS institutes  |
| From 2018<br>To present           | Italian representative in the Board of the National Coordinator for EATRIS-ERIC  |

|                                 |  |
|---------------------------------|--|
| From 2018<br>To present         | <ul style="list-style-type: none"> <li>Representative of the Personnel elected by the members of the Research Coordination and Support Service (CoRi, Istituto Superiore di Sanità)</li> </ul> |
| From 2016<br>To present         | <ul style="list-style-type: none"> <li>Member of the Working Table with the Technology Transfer Offices of the IRCCS, promoted by the Ministry of Health.</li> </ul>                           |
| Since 2015.<br>To February 2024 | <ul style="list-style-type: none"> <li>Deputy in the Board of Governors of EATRIS-ERIC.</li> </ul>   |
| Since 2015<br>To present        | <ul style="list-style-type: none"> <li>Member of the Scientific Technical Secretariat of the A_IATRIS Association</li> </ul>   |

## SERVICE TO NATIONAL AND INTERNATIONAL COMMUNITY

|                                  |   |
|----------------------------------|---|
| From 2017<br>To present          | <ul style="list-style-type: none"> <li>I am interested in all the activities through which knowledge, produced by scientific research infrastructures, is transformed to create new therapeutic products, processes and strategies that have an impact on health practice and, ultimately, to increase the quality of services offered for the care of citizens.</li> </ul>   |
| From 2010<br>To present          | <ul style="list-style-type: none"> <li>I work for A_IATRIS the National Node of the European infrastructure EATRIS with the aim of providing a service to national and international users for the implementation of innovative strategies aimed at prevention, diagnosis and treatment of diseases of health and economic importance through collaborative projects or commissioned research.</li> </ul>   |
| From 2000<br>To 2010             | <ul style="list-style-type: none"> <li>At ISS I carried out research activities related to:                             <ul style="list-style-type: none"> <li>The study of the neurobehavioural effects of perinatal exposure to compounds used as flame retardants and environmental contaminants with cholinotoxic activity.</li> <li>The study of the interactions between the immune and nervous systems in opiate addiction</li> <li>The study of the role played by neurotrophic factors (NGF and BDNF) in the response to acute and/or chronic stress and the role of these factors as mediators of the effects of the neonatal environment on brain plasticity and on the emotional behaviour and cognitive capacities of the adult individual.</li> </ul> </li> <li>This basic research activity has been complemented by activities focusing both on animal welfare and the development of alternative methods to reduce suffering and distress in experimental animals.</li> <li>I have also been involved in the coordination of activities in the field of Animal Assisted Activities and Therapies.</li> </ul> |
| From 2002/08/01<br>To 2004/07/31 | <ul style="list-style-type: none"> <li>Supported by a Research grant (2 years awarded by the Department of Natural Substances and General Physiology, Faculty of Pharmacy, "La Sapienza" University of Rome) at the Department of Cellular Biology and Neuroscience of the Istituto Superiore di Sanità (place of execution) I carried out research activity on "Behavioural neuroteratogenesis of halogenated compounds.</li> </ul>  |
| From 2001/03/15<br>To 2001/09/14 | <ul style="list-style-type: none"> <li>Supported by a Research grant (6 months - research grant awarded by the Institute of Neurobiology and Molecular Medicine of the CNR in Rome) at the Department of Cellular Biology and Neurosciences of the Istituto Superiore di Sanità, I carried out research activity on "Synthetic psychostimulants in juvenile and recreational contexts: contribution of a behavioural, neuroendocrine and physical-analytical approach for a comparative human-animal analysis"</li> </ul>   |

|                      |   |
|----------------------|---|
| From 1998<br>To 2000 | <ul style="list-style-type: none"> <li>▪ During my post-doctorate at the Institut des Neurosciences, Université P. M. Curie in Paris in the laboratory Développement et Vieillessement du Système Nerveux I carried out research on:                         <ul style="list-style-type: none"> <li>▪ - abnormalities in the secretion of proinflammatory cytokines by peripheral macrophages in cerebellar Lurcher and Staggerer mutants</li> <li>▪ - cytological analysis of Purkinje cells in adulthood and during ageing in knock-out mice for the RORalpha/staggerer gene.</li> </ul> </li> </ul>  |
| From 1994<br>To 1998 | <ul style="list-style-type: none"> <li>▪ While carrying out my research for the PhD thesis, in Psychobiology and Psychopharmacology at the University of Rome "La Sapienza", I collaborated with:                         <ul style="list-style-type: none"> <li>▪ - the Institute of Human Physiology at the University of Siena conducting research on the analgesic effects of the cholinergic agonist oxotremorin, in the formalin test.</li> <li>▪ - the Institute of Pharmacology of the Polish Academy of Sciences in Cracow conducting research into 1) the expression of Immediate Early Gene and Nitric Oxide Synthase, in the spinal cord of rats, after administration of formalin, 2) the expression of genes coding for opioid peptides following tonic-type nociceptive stimulation in the rat.</li> </ul> </li> </ul> |

## TEACHING EXPERIENCE

|                   |   |
|-------------------|---|
| From 2005 to 2006 | <ul style="list-style-type: none"> <li>▪ Professor, Intensive Course of Recovery and Support in General Physiology, Faculty of Pharmacy, Department of Human Physiology and Pharmacology "Vittorio Erspamer", University of Rome "La Sapienza"</li> </ul>                             |
| From 2004 to 2005 | <ul style="list-style-type: none"> <li>▪ Professor, Intensive Course of Recovery and Support in General Physiology, Faculty of Pharmacy, Department of Human Physiology and Pharmacology "Vittorio Erspamer", University of Rome "La Sapienza"</li> </ul>                             |
| From 2003 to 2004 | <ul style="list-style-type: none"> <li>▪ Professor, Intensive Course of Recovery and Support in General Physiology, Faculty of Pharmacy, Department of Human Physiology and Pharmacology "Vittorio Erspamer", University of Rome "La Sapienza"</li> </ul>                             |
| From 2002 to 2003 | <ul style="list-style-type: none"> <li>▪ Professor, Intensive Course of Recovery and Support in General Physiology, Faculty of Pharmacy, Department of Human Physiology and Pharmacology "Vittorio Erspamer", University of Rome "La Sapienza" teaching experience details</li> </ul> |

## MAIN RESEARCH EXPERIENCE

|          |   |
|----------|---|
| May 2024 | Research project: EATRIS-CONNECT (HORIZON-INFRA2023-DEV-01-03 Consolidation of the RI landscape – Individual support for evolution and long-term sustainability of pan-European research infrastructures). The project ( ca. €5mn total budget, 3 years duration) will evolve EATRIS' translational medicine capacities through digital transformation. |
|----------|---|

|                        |  |
|------------------------|--|
| <p>2022 to present</p> | <p>Research project on the Research and Innovation Programme presented on the MUR Notice No. 3277 of 30/12/2021, having identification code ECS000024, scope of intervention "Digital, industry and space", entitled "Rome Technopole". A three-year funded project by PNRR.</p> <p>Responsible for coordination activities of Spoke 2 (Technology transfer, new entrepreneurship, business incubation and acceleration) of the ISS, with the aim of supporting the activities related to tasks 2.1 (Valorisation of research results for industrialisation), 2.2 (Valorisation of technologies for industrialisation), 2.5 (Training in technology transfer) and 2.6 (Patenting &amp; licensing), within the Health &amp; BioPharma. Member of the Working Group: 'Training in Technology Transfer' and I was one of the organisers and scientific directors of the course 'Intellectual property and brand protection: focus on medical devices and biotechnology' held on 19 May 2023 in Rome at ISS. I'm also member of the Working Group 'Business Acceleration and Venture Capital', aimed at supporting the growth of start-ups and spin-offs. I participated in and was one of the organisers of the "Tech Transfer Day   Spin-offs and Start-ups Meet the Investors", the first pilot fundraising event where selected spin-off and start-up teams from the academic and research world presented themselves to the Rome Technopole partners and potential investors.</p> |
| <p>2020-2023</p>       | <p>Research Project: EATRIS-Plus Consolidating the Capacities of EATRIS-ERIC for Personalised Medicine, funded by the European Commission (4,999,023.75 Euro, Grant ID: 871096) under the call INFRADEV-3. It is a four-year project (deadline 31 December 2023) for the sustainability of infrastructure in the field of personalized medicine. The project, involving 19 partners, including all existing national infrastructure nodes, aims at developing further capacities and providing innovative scientific tools to support the long-term sustainability of EATRIS.</p> <p>Role: I'm mainly involved in Work Package 4 which has, among its objectives, the creation of a regulatory task-force able to support, the infrastructure even beyond the end of the project itself.</p>   |
| <p>2019-2022</p>       | <p>Research project: ADVANCE project funded by the European Commission in the framework of the Erasmus Plus project (375.000 Euro) involving five European partners.</p> <p>Role: I participate in meetings and discussions related to the programming of webinars and provides scientific support to the organization of courses aimed at training biomedical scientists at the beginning of their career to make ATMP developers competent and prepared.</p>   |
| <p>2017-2021</p>       | <p>Research project: EURE-CART project (European Endeavour for Chimeric Antigen Receptor Therapies), financed by European Commission ( 5.903.146 Euros) as part of funds for new therapies for chronic diseases (including cancer) the Research and Innovation Framework Programme "Horizon 2020" (H2020-EU.3.1.3 - Grant agreement ID: 733297).</p> <p>Role: I was involved, in particular, in Work Package 3, the aim of which was to establish contact with the national regulatory authorities of four EU countries (IT, DE, ES, CZ) in order to promote harmoniously, the application of EU legislation on advanced therapies and, in particular, on CAR-T cells. I am among the authors of "A White Paper on the Regulatory issues of CAR-T cells"</p> <p><a href="https://ec.europa.eu/research/participants/documents/downloadPublic?documentIds=080166e5df2bc67b&amp;appId=PPGMS">https://ec.europa.eu/research/participants/documents/downloadPublic?documentIds=080166e5df2bc67b&amp;appId=PPGMS</a></p>  |
