JOB-RELATED SKILLS

Job-related skills

My professional profile was born as neurobiologist and then I've acquired a biomedical approach and a strong expertise in genetics and molecular biology. During my career I've also elaborated some expertises in immunohistochemistry, in situ hybridization, cloning, cell culture, animal handling, microscopy (fluorescent and confocal), extraction of monocytes (to put them in culture) and nucleic acids from human blood, and other techniques necessary to the results of my studies. I've also acquired some basic skills in bioinformatics. Moreover, during my PhD, I have also performed a tutoring activity for master students' internship or thesis.

Since 2020 I'm a SIGU (società italiana di genetica umana) member
