### Principal Investigator

---

**“The daily examination of the influence of inclusive teaching on the association between high school students' feedback sensitivity and their maladjustment”**

PI: **Ph.D. Carolina Lunetti** – *Department of Psychology, La Sapienza University of Rome (Italy).*

Supported by Sapienza University of Rome (Grant: Avvio alla ricerca **[Starting Research]**).

**Description of the project:** the aim of the project is to increase theoretical and practical knowledge about the importance of the instability/stability of inclusive teaching in influencing the association between their personality characteristics (personality traits and self-efficacy beliefs) and internalizing and externalizing problems. Participants are a sample of 200 high school students and their teachers from Rome. Questionnaires regarding students' personality and maladjustment are administered to students. Mobile Ecological Momentary assessment are used for 21 consecutive days, once a day, to assess the teachers' stability vs instability of inclusive teaching administered to teachers.

**Date: November 2022 – Ongoing**

**“PROINCLU: Predictors and Outcomes of Inclusive Teaching during Middle School: The Role of Academic Self-Efficacy, Feedback Sensitivity and Prosocial Behavior”**

PI: **Ph.D. Carolina Lunetti** – *Department of Psychology, La Sapienza University of Rome (Italy).*

Supported by Sapienza University of Rome (Grant: BE-FOR ERC 2021)

**Description of the project:** the aim of the project is to increase theoretical and practical knowledge about the importance of the instability/stability of inclusive teaching in influencing the association between feedback sensitivity as well as their academic self-efficacy and academic performance/prosocial behaviors. Participants are a sample of 200 middle school students and their teachers from Rome. Questionnaires regarding students' feedback sensitivity, academic self-efficacy, academic performance and prosocial behaviors are administered to students.

Carolina Lunetti

Mobile Ecological Momentary assessment are used for 21 consecutive days, once a day, to assess the teachers' stability vs instability of inclusive teaching, and then pen-paper questionnaire regarding students' academic performance and prosocial behaviors are administered to teachers.

**Date: February 2022 – Ongoing**

**“Personality Correlates of Psychosocial Adjustment Through the Adolescence”**

PI: **Ph.D. Carolina Lunetti** – *Department of Psychology, La Sapienza University of Rome (Italy)*.

Supported by Sapienza University of Rome (Grant: Avvio alla ricerca [**Starting Research**])

**Description of the project:** the aim of the project is to identify personality prototypes in Italian preadolescents sample and to examine their association with adolescents' adaptive outcomes (prosocial behavior and self-efficacy beliefs).

**Date: July 2017 – July 2018**

**Research Assistant**

---

**“A Virtual Agent Group Facilitator for a Holistic Student-Centric Approach to Academic and Socio-Emotional Learning” – International Study**

PI: **Laura Di Giunta** (Ph.D.) – *La Sapienza University of Rome (Italy)*; Goren Gordon (Ph.D.) – *Tel Aviv University (Israel)*

Supported by Jacobs Foundation, *Switzerland*.

**Role:** Research Assistant – activities implementation, data collection, data entering and data scoring and analysing

**Supervisor:** Laura Di Giunta (Ph.D.)

**Description of the project:** The goal of project was to promote school-aged children's academic and socio-emotional learning (ASEL) through the virtual environment they all learned because of the increase in use of technologies for remote learning in the context of the COVID-19 pandemic. Children were exposed to online small group activities facilitated by a virtual agent. To examine improvements in children's ASEL it has been use a quantitative approach (e.g., administering questionnaires and collecting school records) in a pre-post-follow-up design, as well as a qualitative approach (e.g., conducting semi-structured interviews with teachers to examine the effectiveness of the online small group discussion facilitated by the virtual agent and the full integration of the system, in their perception of children's increase in ASEL). The ongoing project is conducting in Italy and Israel.

**Date: October 2021 – Present**

**“Effects of Feedback Sensitivity and Emotion Regulation on Learning and School Performance in Adolescents from Multiple Countries” – International Study**

PI: **Laura Di Giunta** (Ph.D.) – *La Sapienza University of Rome (Italy)*; Natasha Duell (Ph.D.) – *University of North Carolina (US)*

Supported by Jacobs Foundation, *Switzerland*.

**Role:** Research Assistant – EMA online survey creation and administration, data entering and data scoring and analysing

**Supervisor:** Laura Di Giunta (Ph.D.)

**Description of the project:** the aim of the project was to examine the associations between feedback sensitivity and emotion regulation in affecting Colombian adolescents school performance and adjustment, using the procedures of behavioural tasks and Mobile Ecological Momentary Assessment

**Date: November 2021 – January 2022**

**“Parental emotion socialization in the context of COVID-19 pandemic” – International Study**

PI: **Laura Di Giunta** (Ph.D.) – *La Sapienza University of Rome (Italy)*.

Supported by Jacobs Foundation, *Switzerland*.

**Role:** Research Assistant – online survey creation, interviewer, data entering and data scoring and analysing –

**Supervisor:** Laura Di Giunta (Ph.D.)

**Description of the project:** the aim of the project was to examine parental emotional socialization (what parents do in response to their children's emotional reaction) in COVID time. This project uses qualtrics' online platform as a

Carolina Lunetti

data collection procedure and provides for the remote administration of questionnaires in different countries belonging to different continents of the world.

**Date: August 2020 – Present**

**“Emotion Regulation in Adolescence: The role of parents and its prediction of youths’ mental health” – Clinical National Study**

PI: **Laura Di Giunta** (Ph.D) – *La Sapienza University of Rome (Italy)*.

Supported by Jacobs Foundation, *Switzerland*.

**Role:** Research Assistant – online survey creation, interviewer, data entering and data scoring and analysing –

**Supervisor:** Laura Di Giunta (Ph.D)

**Description of the project:** the aim of the project was to understand the individual differences that predict youths’ psychological maladjustment, especially focusing on the emotion regulation-related constructs and social competences in a clinical sample of adolescents. This project uses the method known as ecological momentary assessment (EMA) to assess emotions and social competences in adolescence, so the youths’ were prompted via mobile phones (by using the qualtrics’ platform) to repeatedly respond to a questionnaire

**Date: June 2019 – August 2020**
