WORK EXPERIENCE

PhD student in "Advances in Infectious Diseases, Microbiology, Legal Medicine and Public Health Sciences" with a Green-Topic bound fellowship, funded through the Research and Innovation - National Operational Program (NOP)

Department of Public Health and Infectious Diseases – Sapienza University of Rome [31/12/2021 – 31/12/2024] **City:** Rome (and Padua, Brisbane) **Country:** Italy (and Australia)

The PhD project aims at building skills needed to develop, plan and support pyrethroid-free management of mosquitoes by conventional and innovative integrated control approaches with the final goal to contribute in reducing the environmental and human health impact of pyrethroid pesticides in urban areas. Therefore, two study and research periods were carried out: a 7-month one at Entostudio (Ponte San Nicolò - Padova) an entomological laboratory specialized in insecticide and repellent testing, field testing, and development of pest control protocols and a 5-month period at the University of Queensland (Brisbane, Australia) in the Vector Biology Lab of Professor Beebe, carrying out a Mark-Release-Recapture experiment to characterize the longevity and dispersal of males of *Ae. aegypti* (the arbovirus vector in Australia) in order to implement integrated vector management strategies.

Junior Scholarship Concerning Research Activities

Department of Public Health and Infectious Diseases – Sapienza University of Rome [01/04/2021 – 30/12/2021] **City:** Rome **Country:** Italy
