

Please allow me to introduce myself. I am Sisi Tan, got a postgraduate diploma from the University of Sheffield. Now is a lecturer in the school of Architecture Engineering. BIM technology, engineering cost management and consulting are my research interests. Therefore, I got China Registered cost engineer Certificate and BIM technology qualification Certificate. In the past several years, The paper I wrote won the second prize of Liuzhou Vocational Education Paper in 2019. Guided students to participate in college students' Internet + Innovation and entrepreneurship competition in Guangxi province for many times and won silver awards or bronze awards, etc. Published more than 6 unique papers related to BIM technology and prefabricated building construction technology. Hosted a project involving BIM technology and prefabricated building applications, and mainly participated in the three research projects at the district level. Also participated in the two public textbook for prefabricated building construction technology.
