
BIOGRAPHICAL SKETCH

NAME: Marta Giovanetti

eRA COMMONS USER NAME (credential, e.g., agencylogin): Giovanetti M

POSITION TITLE: Visiting Researcher at the Oswaldo Cruz Foundation (FIOCRUZ).

EDUCATION/TRAINING (*Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable. Add/delete rows as necessary.*)

INSTITUTION AND LOCATION	DEGREE (if applicable)	Completion Date YYYY	FIELD OF STUDY
University of Rome "Tor Vergata", Italy	BS	2011	Human Biology
University of Rome "Tor Vergata", Italy	MS	2013	Cellular and Molecular Biology
Oswaldo Cruz Foundation Salvador, Brazil	Visiting Fellow	2015	Phylogenetic, Phylodynamics and Bioinformatics
University of Rome "Tor Vergata", Faculty of Medicine, Italy	Ph.D.	2017	Immunology and Applied Biotechnology
Department of Zoology, University of Oxford, United Kingdom	Visiting Research Fellow	2017	Phylogenetic, Phylodynamics and Phylogeographic Inference
Gonçalo Moniz Research Center, Oswaldo Cruz Foundation, Salvador, Brazil	Post Doc	2017-2018	Genomic Surveillance; Next-Generation-Sequencing. Metagenomics.
Oswaldo Cruz Foundation Rio de Janeiro, Brazil	Visiting Researcher	2018-ongoing	Genomic Surveillance; Next-Generation-Sequencing. Metagenomics.
Katholieke Universiteit Leuven, Belgium	Visiting Research Fellow	2019	Discovery by Metagenomics
Bioinformatics Centre of the KwaZulu-Natal Research Innovation and Sequencing Platform (KRISP), at University of KwaZulu-Natal, South Africa	Visiting Research Fellow	2019	Discovery by Metagenomics, Bioinformatics
Faculty of Medicine, Campus Biomedico University, Rome, Italy	Visiting Professor	2020	Molecular Biology, Virology and Bioinformatics

A. Personal Statement

My research focuses on investigating the patterns of gene flow in pathogen populations, focusing in phylogenetics and phylogeography as tools to recreate and understand the determinants of viral outbreaks and how this information can be translated into public policy recommendations. More specifically, my research focuses on recent arboviral outbreaks in Latin America (Zika, Chikungunya, Dengue and Yellow fever viruses and more recently SARS-CoV-2 in Brazil, Italy and South Africa), combining genetic, spatial and ecological information. I am interested in the epidemiology and ecology of viruses in natural populations. My research involves developing and applying techniques to integrate virus genetic data with traditional clinical and demographic data.

After completing my PhD in molecular evolution of RNA viruses in the University of Rome Tor Vergata in Italy and performing field work in Sierra Leone with Ebola virus, I've started a postdoctoral position in the Laboratory of Prof. Luiz Carlos Junior Alcantara at the Fundação Oswaldo Cruz (FIOCRUZ), Salvador, Brazil, investigating the evolution of arthropod-borne viruses. I am currently a Visiting Researcher fellow at the Regional Reference Laboratory of Flavivirus in the Oswaldo Cruz Institute in the Fundação Oswaldo Cruz in Rio de Janeiro, Brazil working with the ZiBRA-2 project (Zika in Brazil real-time analysis, www.zibra2project.org), a project that aims to improve genomic surveillance of emergent and re-emergent RNA viruses circulating in Brazil. We built upon recent methodological advances in virus nanopore sequencing (e.g. Faria et al., 2017, Nature; Quick et al., 2016, Nature; Faria et al., Science 2018; Giovanetti et al., Cell Report 2020), that gave us the possibility to generate more than 5000 complete genomes from viruses from different geographic regions in Brazil. My research focuses on generating these genomes in real-time using nanopore sequencing technology and to analyse large datasets of genetic data to gain insights into the origins and mode of spread of key viral pathogens with significant public health impact.

B. Positions and Honors

2015 – 2016 Gonçalo Moniz Research Center, Oswaldo Cruz Foundation, Salvador, Bahia, Brazil. Visiting Fellow.

2017 Department of Zoology, University of Oxford, United Kingdom. Visiting Research Fellow.

2017-2018 Gonçalo Moniz Research Center, Oswaldo Cruz Foundation, Salvador, Brazil. Post-doctoral fellow.

2018 – Present Federal University of Minas Gerais State (UFMG), Instituto de Ciencias Biologicas. Visiting Professor (Bioinformatics).

2018 – Present Oswaldo Cruz Foundation Rio de Janeiro, Brazil, Visiting Researcher fellow.

2019 Katholieke Universiteit Leuven, Belgium. Visiting Research Fellow.

2019 Bioinformatics Centre of the KwaZulu-Natal Research Innovation and Sequencing Platform (KRISP), at University of KwaZulu-Natal, South Africa. Visiting Research Fellow.

2020 Campus Biomedico University, Rome Italy. Visiting Professor.

2021. Associate Professor in Microbiology, habilitation to Prof (Level II) (National Scientific Qualification), September 2021.

Reviewer for multiple journals: Plos One, PeerJ, American journal of infectious diseases (Am J Infect Dis), Journal of Medical Virology, Infection Genetics and Evolution, Microbial Pathogenesis, Nature Microbiology, Emerging Infectious Diseases, Lancet Infectious Diseases.

Editor in peer-review journals: Plos One, Frontiers in Genetics

Language: English –Portuguese – Italian (mother tongue).

C. Contribution to Science

SARS-CoV-2:

Dr. Giovanetti was fully involved in the SARS-CoV-2 genomic monitoring in Brazil, Italy and South Africa. Currently she was recognized as the Researcher with the majority number and most cited papers on COVID-19 in Brazil (over 30 publications and 1000 citations) (more available here: <https://jornal.usp.br/ciencias/usp-esta-entre-as-20-instituicoes-que-mais-publicam-sobre-covid-no-mundo/>), and she was also awarded the “*Researcher Productivity Fellowship*” considering her numbers of publications and her dedication in Science by the Conselho Nacional de Desenvolvimento Científico e Tecnológico CNPq.

Arbovirus

In the arbovirus research group of the Oswaldo Cruz Foundation (FIOCRUZ), coordinated by Dr. Luiz Alcantara, Dr Giovanetti has carried out genomic and epidemiological surveillance activities during the Zika virus (ZIKV) (<http://www.zibraproject.org/>) (<http://www.who.int/emergencies/zika-virus/articles/then-now-vazquez/en/>), Chikungunya (CHIKV) and Yellow Fever (YFV) epidemics registered in Brazil between the years 2015 to 2021. Doing genomic surveillance of arboviruses since

2016, through the ZIBRA project (Zika in Brazil Real time Analysis) in partnership with PAHO / WHO and the Ministry of Health, she was involved in the development of protocols for the generation of complete genomes (using nanopore technology) of different arboviruses such as Zika (ZIKV), Chikungunya (CHIKV), West Nile Fever (WNV), Yellow Fever (YFV), Punta Toro (PTV), Saint Louis (SLV), Oropouche (OROV), Dengue 1-4 (DENV), Mayaro (MAYV), Ilheus (ILHV) and, Japanese Encephalitis (JEV). Those protocols have been tested using positive samples from infected individuals, stored in the different Brazilian Government Public Health Laboratory (LACENs), in the FIOCRUZ/Recife, in the arbovirus reference laboratory from the Oswaldo Cruz Institute/FIOCRUZ-RJ, in the Gorgas Institute of Panama, in the Laboratory Central Public Health of Paraguay and in the National Institute of Public Health of Angola. To date, they have generated more than 5,000 complete viral genomes available in public databases.

During the second stage of the ZIBRA project in the Midwest Brazil (zibra2project.org), they were also involved in a mobile sequencing mission, for the genomic monitoring (using nanopore sequencing) of the arboviruses circulating and co-circulating in that region, such as zika, dengue e chikungunya, and they generated more than 200 complete viral genomes in real time. Also, during this project, a developing protocol for metagenomics was tested and presented successful outcomes. These researches have resulted in publications in renowned journals as follows: Zika virus in the Americas: Early epidemiological and genetic findings, *Science*, 2016; Establishment and cryptic transmission of Zika virus in Brazil and the Americas in *Nature* 2017; Multiplex PCR method for MinION and Illumina sequencing of Zika and other virus genomes directly from clinical samples, *Nature Protocol*, 2017. Genomic and epidemiological monitoring of yellow fever virus transmission potential in *Science* 2018; Genetic evidence of Zika virus in mother's breast milk and body fluids of a newborn with severe congenital defects, *Clinical Microbiology And Infection*, 2018; Genomic, epidemiological and digital surveillance of Chikungunya virus in the Brazilian Amazon in *PLoS Negl Trop Dis* 2019; Circulation of chikungunya virus East/Central/South African lineage in Rio de Janeiro, Brazil, *PLoS One* 2019; Lipidomic Analysis Reveals Serum Alteration of Plasmalogens in Patients Infected With ZIKA Virus, *Frontiers in Microbiology*, 2019; Yellow fever virus re-emergence and spread in Southeast Brazil, 2016-2019, *Journal of Virology*, 2019; Return of the founder Chikungunya virus to its place of introduction into Brazil is revealed by genomic characterization of exanthematic disease cases, *Emerging Microbes & Infections*, 2019; A computational method for the identification of Dengue, Zika and Chikungunya virus species and genotypes, *PLoS One*, 2019 and Genomic and Epidemiological Surveillance of Zika Virus in the Amazon Region, *Cell Reports*, 2020.

During those activities she established also international collaborations with researchers from the University of Oxford and the University of Birmingham, both in the UK, and with Dr. Tulio de Oliveira from the KwaZulu-Natal Research and Innovation Sequencing Platform, in South Africa. Moreover, National collaborations have been established with researchers from the University of São Paulo, such as Dr. Ester Sabino from the Institute of Tropical Medicine of the University of Sao Paulo, and a partnership with Fundação Ezequiel Dias, Minas Gerais. Dr. Giovanetti works alongside the Dr. Alcantara and the Dr. Ana Maria Bispo de Filippis in the regional reference diagnostic service of the Flavivirus Laboratory of the Oswaldo Cruz Institute, Rio de Janeiro.

Recently (October 2021) due to her commitment in the arbovirus surveillance research she was awarded by [the L'Oréal-UNESCO For Women in Science prize](#).

HTLV and HIV

Brazil has locally high concentrations of both African and Japanese descendants, both populations with high levels of HTLV and HIV infection. Dr Giovanetti have used sequencing and other molecular modalities to understand the history of those infections and the dynamics of their epidemiology.

Ebola

Dr Giovanetti was also involved in fieldwork in Sierra Leone during the Ebola Outbreak in West Africa in 2015-2016.

Research Support

2015–2017. Research Project as Principal Investigator: Identification and Influence of Different Subtypes and/or Recombinant HIV Forms and Viro-immunological Determinants in Viral Persistence and Determination of Clinical Severity.

Founded by Gilead Italy (10,000 Euro).

2018-Present. Research Project as Principal Investigator: Genomic monitoring of Zika, Chikungunya, Dengue and Yellow Fever viruses and early detection of potential emerging viruses in Brazil.

Founded by CNPq, Conselho Nacional de Desenvolvimento Científico e Tecnológico, Brazil. (30,000 Reais)

2020- Present. Research Project as Principal Investigator: One Health International Network for SARS-CoV-2 real time genomic monitoring.

Founded by CRP - ICGEB Research Grants Programme 2020 (Special call on COVID-19). (15,000 Euro).

2021- Present. L'Oréal-UNESCO For Women in Science 2021 Programme. (50,000 Reais).

Interested topics

- Molecular epidemiology and evolution of human viruses
- Clinical-epidemiological correlations in human viruses
- Development of new bioinformatics tools for the study of human / host virus genes
- Next generation sequencing
- Metagenomics
- Phylodynamics
- Molecular Epidemiology
- Genomic monitoring of emerging and re-emerging viral pathogens

She has authored 133 articles published in international peer-review journals, 2 book chapters and she also have involved in the development of 3 open-source software for virus genotyping.

Regarding human resources, she has already co-advised 5 Ph.D. students, advised 2 Ph.D. students, 3 MSc students and 1 graduate student.
