

Short CV of Giandomenico BOFFI

Full professor of Algebra at the University of International Studies of Rome – UNINT

- University degree in Mathematics at Sapienza University of Rome and Ph.D. in Mathematics at Brandeis University, Boston.
- Various permanent positions in several Italian universities (Rome Tor Vergata, Naples, Trieste, Pescara, Rome UNINT) teaching Mathematics to students majoring in Mathematics, Physics, Engineering and Economics.
- Head of the Laboratory of Mathematical Sciences in current university.
- Research in theoretical and applicative aspects of commutative algebra, computer algebra and algebraic geometry.
- Also interested in the didactics of Mathematics and the interactions of Mathematics and society.
- Head of the Committee in charge of organizing every year the Mediterranean Youth Mathematical Championship (MYMC) on behalf of the Italian Ministry of Education (cf. www.mymc.it). The competition wishes to encourage Mediterranean teen agers, both male and female, to deepen their interest in Mathematics, a discipline which has been of great importance for the growth of the cultural community of the Mediterranean Sea, with its many nations and religions.
