

## ● ABOUT ME

My educational background is mainly focused on entomology applied to ecology, as direct proxy to the understanding of both natural and anthropogenic-driven processes. Throughout my bachelor's thesis and apprenticeships, I had the opportunity to enhance my understanding of Diptera and Hymenoptera phylogenomics and identification, with a specific focus on Conopidae (parasitoid Diptera) and Apoidea Sphecidae and Anthophila (predatory and pollinator Hymenoptera). I possess expertise in Data Analysis, particularly utilizing Excel and R for statistical inference. I have actively taken part in several field activities, including the use of pan-traps, malaise and direct specimen capture.

## ● WORK EXPERIENCE

11/2024 – 02/2025 Roma, Italy

**EDUCATOR** CLIMAX S.C.A.R.L.

Operator responsible for conducting educational activities and lessons in primary and secondary schools, including the preparation and facilitation of field activities. Specialized in delivering educational content on natural sciences and leading laboratories of informatics in class.

## ● VOLUNTEERING

---

06/2022 – 09/2022 Roma

**SPRING project ("Strengthening pollinator recovery through indicators and monitoring") - CREA**

---

Volunteering participation in the activities conducted under the "SPRING" project, which was developed under the "STING" project ("Science and Technology for Pollinating Insects"). The former aimed to engage experts in implementing field-based monitoring schemes to provide accurate assessments of pollinator populations across European countries. This initiative led to the proposal and publication of the EU Pollinator Monitoring Scheme ("EUPOMS") in October 2020.

The "SPRING" project was launched by the European Commission in June 2021. My activities mostly took place in urban parks, specifically at Parco della Caffarella in Rome. My responsibilities included positioning of pan-traps and conducting transects for butterfly detection and on-site species identification.
