## Outline and research interests

My research interests are mainly in the field of **cognitive psychology**, with particular attention to the application of new technologies to study cognitive processes. One of the most enigmatic and complex aspects of cognition concerns lying. During my academic career, I focused on the study of deception. I integrate the psychology knowledge with notions of AI to develop **intelligent lie detection and memory detection** machines mostly based on the analysis of the interaction between humans and machines.

I am deepening several research lines that contextualize lies in different scenarios. For example, I studied the deception about identity and its implications in terms of security, both physical and virtual (e.g., on the internet). An issue related to deception in the online environment concerns fake reviews, a phenomenon that has a great economic impact. Another area where lie detection is crucial is legal context. Particularly, I studied the phenomenon of **malingering**, or the fabrication, feigning, or exaggeration of physical or psychological symptoms designed to achieve the desired outcome (for example, claim compensation, justify work absence, avoid jail, etc.). My scientific works are aimed to develop new tools to detect malingering in the most simulated syndromes (whiplash, depression, cognitive impairment, amnesia, etc.) using new technologies (e.g., mouse tracking, eye tracking) and integrating data analysis techniques based on **machine learning**. Another relevant topic is faking good: using **behavioural measures (RT, mouse tracking)** and machine learning models, we studied how to detect people who **fake good in personality questionnaires**.

More generally, I am interested in the **application of Artificial Intelligence** and cutting-edge technologies (e.g., **Virtual Reality, Augmented Reality, automated facial expression recognition, eye tracking, mouse and keystroke analysis**) to **study the human mind and behaviour**. More recently, I started to work on **cognitive abilities of LLMs** and on issues such as **AI explainability and fairness**.

## Qualifications

Date May 2021 – May 2030

Qualification **Abilitazione Scientifica Nazionale (ASN) Settore Concorsuale PSIC-01 (ex 11/E1) - II Fascia**

Date January 2015 – now

Qualification **Qualified psychologist and psychotherapist** (psicologo abilitato iscritto all' "Ordine degli Psicologi del Veneto", n° 9336).

I have practiced as psychologist and psychotherapist in the following fields:

- Counselling and psychotherapy
- Neuropsychology (neuropsychological assessment and rehabilitation)
- Forensic psychology (expert witness in civil and criminal trials: psychiatric infirmity, psychic damage, custody, child abuse, ability to testify, etc.)

## Current position

Date July 2022 – now

Position **Assistant Professor (Ricercatore a Tempo Determinato di tipo A, RTD-A)** at Department of General Psychology, University of Padova.

<b>Past positions</b>	
Date	April 2022 – July 2022
Position	<b>Research fellowship (borsista di ricerca)</b> at Human Inspired Technology Research Centre, University of Padova, for the project “Hybrid Sustainable Worlds”, <b>funded by POR FESR 2014-2020</b> , action 1.1.4 DGR 822/2020. I worked on the use of mixed reality to study human decision making in the marketing field.
Date	December 2021 – March 2022
Position	<b>Research fellowship (borsista di ricerca)</b> at Human Inspired Technology Research Centre, University of Padova, for the project “Hybrid Sustainable Worlds”, <b>funded by POR FESR 2014-2020</b> , action 1.1.4 DGR 822/2020. I worked on the use of augmented reality to study human decision making in the marketing field.
Date	July 2021 – August 2021
Position	<b>Research fellowship (borsista di ricerca)</b> at Department of Mathematics, University of Padova. I worked on the project “ <b>Usability Study of the Explainable-AI functionalities in a Process Mining Software Tool</b> ”.
Date	July 2018 – July 2021
Position	<b>Post-doctoral research fellow (assegnista di ricerca)</b> at Department of General Psychology, University of Padova. The position is <b>funded by the European Union's Horizon 2020</b> research and innovation programme under the project “Back-UP: Personalised Prognostic Models to Improve Well-being and Return to Work After Neck and Low Back Pain”, project No 777090. I worked on <b>developing a machine learning algorithm to detect whiplash malingering based on behavioural indicators</b> .
Date	March 2018 – June 2018
Position	<b>External research collaborator (co.co.co)</b> at Human Inspired Technology Research Centre, University of Padova, for the project “Visual Music”, <b>funded by the European Union's Horizon 2020</b> research and innovation programme under grant agreement No 731986.
Date	November 2014 – October 2017
Position	<b>PhD candidate</b> in Brain, Mind and Computer Science, University of Padova.
Date	April 2013 – November 2014
Position	Graduate student researcher at BrainCare srl.
<b>Scientific publications</b>	<p><b>Metrics on March 25<sup>th</sup>, 2025</b></p> <p>Scopus Number of publications = 62            Citations = 1202            H-index = 17</p> <p>Scholar Citations = 1909            H-index = 23</p> <p><b>List of publications</b></p>
