## PATENTS & INVENTIONS

Pisani, Anthony, 2017, Commitment to Living, USPTO Service Mark, Reg no, 5149913, Int Cl: 41.

## GRANTS & CONTRACTS

R01 MH131738

NIH (NIMH) PI: Wyman

Effective upstream suicide prevention programs that can be implemented in real-world military settings are urgently needed to address the significant and growing problem of military suicides. This study tests and prepares the Wingman-Connect Program for large-scale delivery in the US Air Force (USAF). If study hypotheses are supported, Wingman-Connect will be ready for scale-up across the Air Force and potentially to other military branches, providing our nation's military with the first universal intervention that reduces suicidal behavior, depression, and occupational problems across a broad military population.

Role: Investigator, Co-Investigator, Co-Director

R01 MH133587

07/2023-06/2027

NIH (NIMH) MPI: Bagge, Conner

Mixed methods examination of warning signs within 24 hours of suicide attempt in hospitalized adults  
Warning signs signal immediate risk for suicidal behavior and their assessment is of critical importance in acute care settings including emergency departments and crisis lines. This innovative 4-year study analyzes adult hospital patients' stories of their suicide attempts in their own words and through systematic review of the hours leading up to the attempt. The project is designed to discover warning signs that have been overlooked, to clarify which warning signs confer especially high risk, and to explore the language patients use to describe warning signs, results that are critical to improve risk assessment in acute care settings.

Role: Co-Investigator

R34 MH131914

4/2023-2/2023

NIH (NIMH), Pisani (PI)

*Pilot Effectiveness Trial of THRIVE in Crisis Stabilization Centers: Promoting Connection, Recovery, and Treatment Linkage After Suicide Crisis*

Crisis stabilization centers (CSCs) provide a less costly and more comfortable alternative to Emergency Department care for individuals with acute suicidal crises. With demand for crisis alternatives growing, effective interventions designed and tested for CSCs are urgently needed to realize their life-saving potential. This study adapts and tests the effectiveness of a crisis recovery and follow-up intervention that seeks to reduce suicide risk by strengthening interpersonal connections.

Role: Principal Investigator

R01 MH119264, Pisani (PI)

5/21/2019-2/28/24

NIH (NIMH)

*Effectiveness of a Targeted Brief Intervention for Recent Suicide Attempt Survivors*

Effective, brief, low-cost interventions for individuals who attempt suicide are needed to save lives and achieve the goals of the National Strategy for Suicide Prevention. This time-sensitive proposal leverages an existing federal investment in Zero Suicide to test the effectiveness of a highly promising new treatment for recent suicide attempt survivors and learn how it works. If hypotheses are supported, the study will provide evidence of a brief, practical, and cost-effective therapy that reduces suicide reattempts in a real-world health setting.

Role: Principal Investigator

YIG-0-113-20, Lockman (PI)

5/2022-5/2024

Young Investigator Grant, American Foundation for Suicide Prevention

*THRIVE: Pilot study of a brief, recovery-focused intervention for crisis stabilization centers,*

Role: Research Mentor

R01 DA050991-01, Wyman (PI)  
NIH (NIDA)

5/1/2020-4/30/2025

*Testing Peer-led Network Intervention to Prevent Adolescent Vaping*

Effective, school-based interventions are urgently needed to protect adolescents from initiating or continuing use of electronic vaping products (EVPs). This study leverages a state-supported prevention initiative to test the effectiveness of a promising intervention that trains 8<sup>th</sup>-9<sup>th</sup> grade student peer leaders to deliver school-wide vaping prevention campaigns with ongoing adult mentoring. If study hypotheses are supported, the study will provide the first evidence of a school-based preventive intervention that reduces adolescent vaping behaviors, as well as insight into how peer communications can be harnessed to prevent vaping.

Role: Co-investigator

**Completed Research Support**

MSRC Wyman (PI)

5/1/2020-4/30/2025

Military Services Research Consortium (MSRC)

*Testing Wingman-Connect Tailored for First Term Airmen Course and Evaluating Implementation*

This project will prepare W-C, which reduced suicidal ideation and depression among Airmen in training, for extension into the operational Air Force. Through upward extension to build more cohesive, healthy work units, W-C can more directly address suicide prevention needs of Airmen, as rates of suicide and suicidal behavior are highest during early career years. This project also lays the groundwork for a further stage of implementation/effectiveness research.

Role: Co-investigator

W81XWH-14-1-0322, Wyman (PI)

9/8/14–9/7/18

USA Med Research ACQ, Department of Defense (DoD)

*Peer-led Suicide Prevention: Promoting Healthy Family Role Transitions for Military Personnel*

The goal of this project is to develop and test Wingman–Strong for young, enlisted AF personnel by adapting a well-validated universal suicide prevention program, Sources of Strength. Enlisted Peer Leaders trained in Wingman–Strong will conduct in-person and SMS messaging leading to: (a) healthier coping norms, increased unit cohesion, relationship functioning, emotion regulation, and help-seeking, and (b) improved behavioral health, job absenteeism, and reduced risk for suicide.

Role: Investigator

SRG-O-110-15, Pisani (PI)

10/1/16–9/30/18

American Foundation for Suicide Prevention (AFSP)

*Youth Who Text a Crisis Line: Understanding Needs and Help-seeking*

The goal of this project is to examine the needs, help-seeking, and coping support resources of suicidal youth who text in crisis. This information is critical for improving and evaluating crisis text services, and for developing text counseling approaches that not only relieve suicidal crises, but put youth on a path toward greater support in their natural environments. The proposed project takes a first step in this direction.

Role: Principal Investigator

1 R18 HS024224-01 (PI: Cross)

9/1/15–8/31/18

American Healthcare Quality Agency (AHRQ)

*Enhancing Patient Safety Through Simulation: A Randomized Control Trial of Suicide Prevention for Primary Care Providers-in-Training*

This project aims to improve patient safety and decrease rates of suicide by testing a training program for primary care providers-in-training (i.e., residents, nurse practitioners) using simulation methods to learn and demonstrate skills for youth/young adult suicide prevention. Suicide is the second leading cause of death in adolescents and young adults. It is a critical patient safety issue because about half of individuals who die by suicide had contact with primary care providers within one month of their death. Surprisingly, medical practitioners are not trained in suicide prevention.

Role: Investigator

R34-MH112811 Daniel (PI)  
NIH (NIMH)

4/01/2018-03/31/2021

Integrated Electronic and Care Manager Support Intervention for Caregivers of Adolescents with Suicide Attempts  
This treatment development grant is supporting the development and initial testing of an intervention for parents of suicidal youths consisting of regular contact with a care support manager, and use of a mobile health application.  
Role: Consultant

SM080331-01 Pechenick (Project Director)  
Substance Abuse and Mental Health Services Administration (SAMHSA)  
*New York State Zero Suicide Safety Net*

10/1/17-9/30/22

The goal of this project is to reduce suicide attempts and deaths by 20% by advancing adoption of Zero Suicide across New York State. We have two main objectives: (1) implementation of ZS in a large health care system in each of the state's five mental health service regions and (2) an intensive countywide "Zero Suicide Safety Net" designed to link separate health systems and create a unified cross-system approach to ZS.  
Role: Implementation Lead

Gould (PI)  
Substance Abuse and Mental Health Services Administration (SAMHSA)  
*Pilot Evaluation of Crisis Support Over Facebook Messenger*

9/1/17-8/31/18

The goal of this evaluation is to assess immediate reduction in suicide risk in a pilot sample and develop the capability to evaluate CSOM effectiveness at scale. Specifically, in this six-month pilot we will (1) combine information from counselor reports and coded transcripts of 400 CSOM conversations to assess the extent to which CSOM reduced suicidal risk; and (2) use labeled data from this pilot sample to develop a machine learning algorithm that distinguishes CSOM conversations that reduced risk from those that did not. Secondary aims of the pilot are to describe the suicide risk profile of CSOM users and assess the range of chat resolutions, including emergency interventions.  
Role: University of Rochester Site PI

5R01 MH082537-02 Gould (PI)  
NIH (NIMH) Subcontract (PI: Cross)  
*Effectiveness of Suicide Hotline Training*

5/01/11-4/30/12

The goal of this project was to evaluate a major suicide prevention initiative in the US: the National Suicide Prevention Lifeline's roll out of a training program, using the Living Works Applied Suicide Intervention Skills Training (ASIST), across its network of telephone crisis centers. The goal of the subcontract is to assess transfer of training (fidelity) of ASIST across 18 crisis centers using observational measures of adherence and competence.  
Role: Investigator

T32 MH20061 Conwell (PI)  
NIH (NIMH)

9/17/01-7/31/11

*Postdoctoral Training in Suicide Prevention Research*

This National Research Service Award provides postdoctoral training in suicide prevention research.  
Role: Postdoctoral Fellow (100% effort through July 2011)

KL2 RR024136-06 (P.I. Pearson, Thomas A.)  
NIH/NCRR

7/1/11-6/30/13

Mentored Career Development Award from University of Rochester's Clinical and Translational Science Institute  
*Help-seeking among suicidal adolescents: Testing the role of emotion regulation and connectedness with parents* (PI: Pisani)

The goal of this project was to test components of a theoretically informed model of help-seeking among suicidal adolescents, focusing on two potential targets for intervention: emotion regulation and youth-parent connectedness.  
Role: KL2 Scholar

K23MH101449, Pisani (PI)

8/01/13–7/31/17

NIH (NIMH)

Mobile Phone Intervention to Prevent Youth Suicide in Rural Communities

This career development award centered on a school-based intervention delivered to adolescents via text messaging, and a secondary research project integrating text messaging and video technology into a suicide prevention trial with young enlisted personnel in the US Air Force (see W81XWH-14-1-0322 above).

Role: Principal Investigator
