

PERSONAL INFORMATION

Lorenzo Mele

 5, Piazzale Aldo Moro, Room 101 Marco Building 1st floor, Rome, 00185, Italy

 lorenzo.mele@roma1.infn.it

Gender Male | Date of birth 28 October 1992 | Nationality Italian

STUDIES APPLIED FOR Observational Cosmology

EDUCATION AND TRAINING

2018 – 2021 PhD in Astronomy,Astrophysics and Space Science

"La Sapienza" University of Rome

- Thesis title: "Measurements of Spectral Distortions of the Cosmic Microwave Background: the COSMO experiments"
- Thesis subject: Design and optimization of the blackbody reference calibrator of the COSMO experiment via electromagnetic simulations (Ansys HFSS). Calibration of the instrument and separation of the emission from hot optical elements in the optical chain, as from the cryostat vacuum window, not part of the common-mode signal in the differential Martin-Puplett interferometer. Performance forecast of the COSMO experiment based on Internal Linear Combination (ILC) component separation method, moment expansion of the foregrounds are included in the ILC machinery to mimic the superposition of different Dust populations along a line-of-sight.
- Thesis Advisor: Silvia Masi

2015 – 2017 MD in Astronomy and Astrophysics

"La Sapienza" University of Rome

- Thesis title: "QUBIC: Cryogenics and Polarization Modulation System"
- Thesis subject: Description of the half-wave plate polarization system for the QUBIC experiment, the rotation mechanism which guarantees operation at cyogenic temperatures (4K), the position readout system, the mechanical assembly and tests. Study of systematic effects induced by the precession of the modulating element in a Stokes polarimeter and impact on CMB polarization measurements.
- Thesis Advisor: Silvia Masi
- Thesis Co-Advisor: Giuseppe D'Alessandro
- 110 cum laude/110

2012 – 2015 BD in Physics and Astrophysics

"La Sapienza" University of Rome

- Thesis title: "Cosmologia Osservativa Dopo I Risultati Di Planck 2013"
- Thesis subject: Description of the standard cosmological model and its simplest parametrization (Λ CDM model) after high resolution observations of the Planck satellite of the relic radiation from the Big Bang.
- Thesis Advisor: Paolo de Bernardis
- 103/110

PERSONAL SKILLS

Mother tongue Italian

Other languages

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	

English	C1	C1	C1	C1
British Centre License - C1				
Communication skills				
	<ul style="list-style-type: none">– Team work: I have been working in the Experimental Cosmology Group - G31 in Sapienza University of Rome since the Bachelor's degree, and during the PhD I have also worked in various research teams, collaborating with the G31 group, both national and international: the French group of the QUBIC collaboration and the LSPE and COSMO collaborations with Milan, Genova and Pisa teams.– Intercultural skills: I am experienced at working in a European dimension by working in the QUBIC international collaboration.			
Computer skills	<ul style="list-style-type: none">– proficient user of Windows and Linux OS (Ubuntu, Debian)– good command of Python, IDL, Zemax Optics-Studio, Ansys HFSS, SolidWorks, Comsol Multiphysics, C, Matlab, Fortran90, Maple, DesignSpark, Arduino, LateX and Office Suite			
Certifications	<ul style="list-style-type: none">– British Centre English Certification: C1			
Membership	<ul style="list-style-type: none">– MISTRAL, COSMO, OLIMPO, LSPE, QUBIC and LiteBIRD Collaborations			
References	<ul style="list-style-type: none">– Prof. Paolo de Bernardis, Full professor at <i>Sapienza University of Rome</i>, contact: paolo.debernardis@roma1.infn.it– Prof. Silvia Masi, Associated professor at <i>Sapienza University of Rome</i>, contact: silvia.masi@roma1.infn.it– Dr. Giuseppe D'Alessandro, Researcher at <i>Sapienza University of Rome</i>, contact: giuseppe.dalessandro@roma1.infn.it
